

BEANS

BUSH BEANS (*Phaseolus vulgaris*)

NEW! BN6 DRAGON TONGUE Cert. BD/OG Bush wax bean, light yellow with purple stripes which don't remain after cooking. Crisp wide pods which are juicy. Grown by NB.

S \$3.00=1 oz. **M** \$6.00=4 oz. **LG** \$12.00=1 lb

BN2 GOLDEN ROCKY Cert. BD/OG 55 days. Tender yellow wax bean. Good producer on compact plants. Grown by NB.

S \$3.00=1 oz., sows 20 ft., ≈100 seeds **M** \$6.00=4 oz., 80 ft., ≈400 seeds **1 lb** \$13.00=320 ft.

BN3 PROVIDER Cert. OG 50 days. This variety has been the measuring stick for all good green snap-bush beans for many years. We are excited to offer Provider from Tiensvold Farm. They farm 3000 acres, have been certified organic for over 20 years, and have been using the biodynamic preparations on as much land as they are able for the last 10 years. Look for their other offerings on eatorganicbuffalo.com Check out our price for organic provider beans. They are on sale!, We will let you know about the price of the shipping to your location on the 50 pound bags if you email us. Grown by TVF.

S \$3.00=1 oz., ≈98 seeds **M** \$4.00=4 oz. **LG** \$9.50=1 lb **XL** \$35.00=5 lb **50+ lb** \$5.25/ lb bulk rate

NEW! BN5 ROYAL BURGUNDY Cert. BD/OG 50-60 days. Long, tender purple beans turn green when cooked. Grown by NB.

S \$3.00=1 oz. **M** \$6.00=4 oz. **LG** \$10.00=1 lb

POLE BEANS (*P. vulgaris*)

NEW! BP4 AUNT ADA'S ITALIAN Cert. BD/OG 55-60 days. Heirloom came from Italy with the Botanelli family~1900. Pick when beans start to bulge in pods. Delicious, tastes like a buttery snap lima bean.

S \$3.00=1 oz., ≈65 seeds **M** \$6.00=4 oz.

BP5 EARLY RISER Cert. BD/OG 55 days. Early Romano-type pole bean. Flat, 9 in. long pods. Vigorous vines to 10 ft. Does well in the North. Sow after last frost in warm soil. 1" deep, 3" apart, or grow on poles or tipis placing 5-6 seeds at the base of each .pole.Climbs 6-8 ft. Grown by NB.

S \$3.00=1 oz., sows 10 ft., ≈60 seeds **M** \$6.50=4 oz., 40 ft., ≈230 seeds **LG** \$15.00=1 lb, 160 ft., ≈900 seeds **3 lb** \$36.00

BP1 RATTLESNAKE Cert. BD/OG 70 days. Purple streaked dark green pods on 8-10 foot vines notable for their good flavor. These unusual beans catch the customer's eye at the farmer's market and when cooked look like other green beans. Their brown striped seeds, reminiscent of pinto beans, can also be used as a dry bean. Grown by NB.

S \$3.00=1 oz., ≈70 seeds **M** \$8.75=0.5 lb, ≈550 seeds **LG** \$12.00=1 lb, ≈1100 seeds **XL** \$40.00=5 lb, ≈5500 seeds

SOUP BEANS (*P. vulgaris*)

NEW! BS1 BARB'S BEAUTIFUL BEANS Cert. BD/OG HEIRLOOM . Black and white beans with very distinctive markings great for soups. Also known Yin Yang or Calypso. Grown by NB.

S \$3.00=1 oz. **M** \$6.00=4 oz. **LG** \$12.00=1 lb

NEW! BS5 BLACK GARBONZO, KABULI Cert. BD/OG This chickpea is a cool-season annual that requires about 100 days to reach harvest. Sow chickpeas in the garden about the date of the average last frost in spring or slightly earlier

S \$3.00=1 oz.

NEW! BS5 BLUE TEPARARY (TEPERARY) Cert. BD/OG 80 days. A traditional Southwestern crop that's drought and heat tolerant. Has a half-runner habit. Grown by NB.

S \$3.00=1 oz. **LG** \$12.00=1 lb

NEW! BS2 BUCKSKIN Cert. BD/OG 85 days. HEIRLOOM . Abundant production and early. Somewhat sprawling with runners but do not need trellis. Eating quality similar to Pinto when cooked. Golden tan color. Grown by NB.

S \$3.00=1 oz. **M** \$5.50=4 oz. **LG** \$9.00=1 lb

BEETS

(*Beta vulgaris*) ~2,200 seeds/oz.

NEW! BT4 BADGER TORCH Cert. BD/OG Beautiful elongated golden beet with reddish-gold zoning highlight streaks in the roots and yellow stems in leave make this of possible interest to restaurants. Pleasant mild, sweet raw or cooked. Introduction by University of Wisconsin which is now introduced through High Mowing Organic Seeds. Grown by NB. ~2,200 seeds/oz.

S \$3.00=2 g, ~150 seeds **M** \$8.00=0.25 oz., ~450 seeds **1 oz.** \$30.00

BT3 DETROIT DARK RED Cert. BD/OG 60-65 days. HEIRLOOM variety from 1892. Standard dependable open-pollinated variety that you can't beat! Smooth round dark red beet with strong tops. Good for both bunching and storage. Grown by LD. ~2,200 seeds/oz.

S \$3.00=2 g, sows 15 ft., ~150 seeds **M** \$4.00=0.25 oz., ~500 seeds **LG** \$10.00=1 oz., ~2200 seeds

BT8 FEUER KUGEL (fire ball) Ecologically Grown 60-65 days. HEIRLOOM from . Switzerland. Smooth round roots. Skin slips off easily when cooked. Remains sweet and tender to a large size. Has natural zoning in some beets which means there are some white concentric circles in the inner part of the beet in many of the beets which also makes it especially sweet. Stores well. Grown to seed by long time Biodynamic grower Heike Maria Eubanks. ~2,200 seeds/oz.

S \$3.00=2 g, ~150 seeds **M** \$6.00=10 g, ~700 seeds **LG** \$11.00=1 oz., ~6500 seeds

NEW! BT2 LUTZ GREEN LEAF Cert. BD/OG 65-70 days. Sweet tender somewhat heart shaped roots are good winter keepers. Big tender glossy green tops with midribs are delicious. With both tasty roots and leaves, this is a winner. Our strain is one of the most true to type for Lutz. OUTSTANDING sweet flavor. Grown by SA. ~2,000 seeds/oz.

S \$3.00=3 g, ~150 seeds **M** \$7.00=0.25 oz., ~600 seeds **LG** \$15.00=1 oz., ~1200 seeds **4 oz.** \$33.00

NEW! BT1 ROBUSHKA Cert. BD/OG 60-65 days. BACK ORDERED: Vigorous plants with strong tops. Round, smooth-skinned roots are dark red throughout. Selected for its sweet fruit-like taste, it is excellent cooked, grated raw, juiced, pickled or processed. Sow from early spring to mid-summer 10 seeds/ft, " deep, in rows 12-24" apart. Thin to 4" between plants. Grown by BH. ~2,200 seeds/oz.

S \$3.00=2 g, sows 15 ft., ~150 seeds **M** \$5.00=0.25 oz., 75 ft., ~500 seeds

BOOKS & CALENDARS

BK2 DEVELOPING THE SELF Ecologically Grown What is this book doing on a seed offering website? Answer from Meadowlark Hearth Biodynamic Seed Initiative: If we are to strive toward healing the earth, we must seek out ways to work with ourselves as farmers toward healing. "Individual effort toward development of the higher self is essential for genuine progress on the inner work path. The clear insights and exercises outlined in this book reveal the meaning and necessity of this essential striving in the present consciousness soul age, contributing toward enlivening both our inner and outer work at the same time. The path of developing the self and our work in the world are not separated, but united through the practices and their results." 145 pages, weight: 170 grams or .40 lb **\$15.50**

NEW! BK1 STELLA NATURA CALENDAR 2017 (Edited by Sherry Wildfeuer) Ecologically Grown We really enjoy looking at the various updates in the Stella Natura Calendar about the whirling world around the Earth. There is even a place to note your daily weather and gardening accomplishments in next to each day. There is even a handy map which helps with viewing the sky at night. From the publisher: "This Calendar has many aspects: a basic introduction to astronomy, a simple ephemeris, a planting guide, a star map, aid for following the movement of the planets in the night sky, and articles by nine different authors. All of these attempt to provide a true picture of the world outside us and ideas to assist in developing a healthy relation to that world." Writing in her introduction to this year's calendar, Sherry Wildfeuer notes: "This is the fortieth year of Stella Natura! Although I have met only a small number of you, I describe you regularly to prospective authors as intelligent, open-minded individuals who are drawn

to gardening or farming by a love for the Earth and its surroundings. I don't assume any prior knowledge of biodynamics. At the same time, my aim is to offer continuing inspiration and education to long-time practitioners of biodynamics. "When I started producing the Calendar, I turned to my elders to write most of the articles. Later, I asked my peers to contribute. More recently I have been seeking out younger authors; and by now I and my peers are becoming elders ourselves, having the possibility to offer the fruits of our work with the perspective of experience. Walter Goldstein's article exemplifies this, as he describes his extraordinary accomplishments as a corn breeder. Katherine Rapin tells the story of Christian Elwell, founder of South River Miso Company. And I share what I have learned about Justus von Liebig, the early advocate of chemical fertilizer who gained more respect for the inherent life of the soil later in his career, although this is generally overlooked. In this article I have introduced some key concepts of biodynamics which I intend to elaborate in future editions. "In other articles, the cycle of the year is characterized as a breathing process, and we can learn how a farming community has created a mid-winter agricultural festival to support the coming season. " Weight of the calendar is 170 grams **\$15.00**

BK3 THE SPIRIT IN THE REALM OF PLANTS Ecologically Grown You can go online and get this lecture from Rudolf Steiner free. The Spirit in the Realm of Plants: <http://wn.rsarchive.org/Lectures/19101208p01.html> **\$0.00**

BROCCOLI (*Brassica oleracea*) ~6,000 seeds/oz.

NEW! BR2 CALINARO Cert. OG Photo above...The most consistent of the open pollinated heading broccolis that we have experienced. We imported this from Bingenheim Biodynamic Seed company. Three to four inch heads. Side shoots, sometimes as large as the primary head. In future years we hope to grow it out to seed. Try and let us know how it does for you! $\approx 4,400$ seeds/oz.

S \$3.00 \approx 20 seeds, sows 12 ft. **M** \$6.00 \approx 0.5 g, 100 ft. **LG** \$18.00 \approx 2 g, 400 ft.

BR3 UMPQUA Cert. BD/OG 65-80 days. Open-pollinated! Vigorous plants. Head size varies a lot. Good side shoot production. Recommended for home gardeners, small - medium CSA gardens or farmers markets where the gardener is looking for a replacement for all the hybrid broccoli. If you have plenty of space as a farm, the attribute about Umpqua is the long window of harvesting. This variety was bred by Peters Seed back in the 90's. $\approx 6,000$ seeds/oz.

S \$3.00 \approx 0.5 g, sows 100 ft., \approx 100 seeds **M** \$7.00 \approx 2 g, 400 ft., \approx 400 seeds **LG** \$12.00 \approx 7 g, 1400 ft., \approx 1400 seeds

BRUSSELS SPROUTS (*Brassica oleracea*) ~7,000 seeds/oz.

BR1 CHERRY HILL Ecologically Grown An open-pollinated variety bred by Heike Marie Eubanks, a long time small acreage Oregon coast gardener dedicated to ecology and using methods presented by Rudolf Steiner in his 1924 *Agriculture Course*. Especially bred for the northwest or for places where there are mild winters and early spring. It is registered in the **Open Seed Source Initiative**. You have the freedom to use these OSSI-Pledged seeds in any way you choose. In return, you pledge not to restrict others use of these seeds or their derivatives by patents or other means, and to include this Pledge with any transfer of these seeds or their derivatives. This seed is in public domain and cannot be patented. For maritime climates and NOT for harsher climates. $\approx 7,000$ seeds/oz.

S \$3.00 \approx 1 g, \approx 240 seeds **M** \$8.00 \approx 4 g, \approx 850 seeds

CABBAGE (*Brassica oleracea*) ~7,000 seeds/oz.

CB1 AMARANT Cert. BD/OG 75 days. Early cabbage with a wonderful reddish purple hue. Forms solid heads that store well, so good for either early, mid-season, or late crops. Can store for a couple of months into the winter. $\approx 5,330$ seeds/oz.

S \$3.00 \approx 0.125 g, \approx 30 seeds **M** \$7.00 \approx 1 g, \approx 175 seeds **LG** \$12.00 \approx 4 g, \approx 700 seeds

NEW! CB4 DONATOR Cert. BD/OG 90 days. Tightly wrapped leaves, good production and flavor from Germany. One of the very best cabbages for sauerkraut. The abundantly large heads also make great cole slaw. 120 days, In Nebraska we transplant it in mid May to early June, harvest in September Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by BH. $\approx 6,000$ seeds/oz.

S \$3.00=0.5 g, ≈100 seeds **M** \$7.00=2 g, ≈400 seeds **LG** \$20.00=0.25 oz., ≈1500 seeds **XL** \$35.00=1 oz., ≈6000 seeds

SALE! CB2 DOTTENFELDER STORAGE Cert. BD/OG 90 days. Exceedingly tight, firm green fast growing heads with a good sweet flavor. Stores well into APRIL from late spring transplanting the previous year!!! Medium large, slightly oval, firm, green heads. Late cabbage with excellent keeping quality. Outer leaves relatively small, slow growing. Inner core quite short. Harvest in autumn taking care to cut and store soon enough to guard against splitting with autumn moisture. Helpful for market gardeners and CSA's to have this kind of storage cabbage into the next spring when there are few other vegetables to harvest from the garden. There is variability in the shapes of the heads with some being more flat, some oval and some round showing how diverse yet strong the variety is. Cultivation instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by NB. ≈7,000 seeds/oz.

S \$3.00=0.5 g, ≈125 seeds **M** \$6.00=2 g, ≈500 seeds **LG** \$15.00=7 g, ≈1600 seeds

CB3 EARLY BIRD CABBAGE Cert. BD/OG 60 days. Its delicious mild flavor, crisp tender texture, and very early maturity makes this cabbage a winner for CSA's and farmer's markets. Even people who usually do not care for cabbage enjoy its light flavor and crispness. Quick maturity (60 days) allows multiple plantings from early spring through August. Cultivation Instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out to 1" spacing between plants. Harden off and transplant outdoors 18" apart. Early Bird can be planted before the last frost. It can also mature in the autumn after the frost so it is a good cabbage to do in successions since it matures in 60 days. Grown by NB. ≈5,330 seeds/oz.

S \$3.00=0.5 g, ≈120 seeds **M** \$8.00=1.5 g, ≈350 seeds

CB8 EUROPEAN STORAGE Ecologically Grown 100 days. Good long term storage variety with medium size solid green heads grown by Biodynamic gardener Heike Marie Eubanks. Large tall plants, good for wet climates as well as dry, long term storage cabbage. Heike Marie has farmed her acreage with Biodynamic methods for over 30 years. ≈5,330 seeds/oz.

S \$3.00=1 g **M** \$6.00=4 g, ≈650 seeds **LG** \$12.00=0.25 oz., ≈1300 seeds

CH1 GRANAT Cert. BD/OG 60 days. Makes 12 in. high, slender yet solid compact heads. Its crisp mild leaves are delicious in stir fries or delicious winter salad. Grown by BH. ≈9,000 seeds/oz.

S \$3.00=0.25 g, ≈60 seeds **M** \$6.00=1 g, ≈300 seeds **LG** \$11.00=3.5 g, ≈1000 seeds

NEW! CB7 RODYNDA Cert. BD/OG 95-110 days. Bred by Dieter Bauer at Dottenfelderhof in Germany. Deep-burgundy red storage cabbage with medium-large heads, both beautiful and delicious. Excellent storage type! ≈6,000 seeds/oz.

S \$3.00≈30 seeds **M** \$7.00=0.5 g, ≈100 seeds

CHINESE CABBAGE

(*Brassica rapa*) ~9,375 seeds/oz.

CH1 GRANAT Cert. BD/OG 60 days. For autumn harvest. Sow mid July to beginning of August. Makes 11-15 inch high, slender yet solid compact heads. Mild but, refreshing flavour with crisp consistency making it nice for steaming or great for stir fries and excellent for winter salads. Cover with cloth or paper, store at 40 degrees or lower and you will have delicious salad through the winter. A real boon at Farmer's Markets when people are looking for salad ingredients. Grown by BH. ≈9,000 seeds/oz.

S \$3.00=0.25 g, ≈60 seeds **M** \$6.00=1 g, ≈300 seeds **LG** \$11.00=3.5 g, ≈1000 seeds

CARROTS

(*Daucus carota*) ~18,000 seeds/oz.

NEW! CT2 LYRA (leira) Cert. BD/OG Storage carrot selected for longer carrots with a mild sweet taste from the rodelika type which is used a lot in Biodynamic gardens in Europe.. In the photo, these are carrots in March after they have stored the whole winter. Grown by NB. ≈18,000 seeds/oz.

S \$3.00=1 g, sows 20 ft. **M** \$5.00=4 g, 80 ft. **LG** \$12.00=1 oz., 600 ft.

CT7 MILAN NANTES **Cert. BD/OG 72 days.** An early, uniform, blunt-ended early carrot that can be forced under row cover for spring bunching carrots. Can even be stored but its highlight is for early bunching. Very good sweet flavor. Our farmer market customers love the flavor! Cultivation instructions: Sow outdoors from early spring to mid-summer. Grow in full sun in rich, loose, deeply worked soil. Sow 1/2 inch deep and -1 inch apart in rows 12 inches apart. Keep moist until seedlings emerge. Thin to 2 inches between plants. Grown by BH and NB. *~18,000 seeds/oz.*
Check www.turtletreeseed.org for sizes and availability.

NEW! CT8 PURPLE DRAGON **Cert. BD/OG** This carrot is best planted later in the season. Otherwise it tends to bolt when planted early in the spring. Sweet yet pungent, a different taste in carrots, the purple gives a new look to carrots. Truly purple skin with orange flesh inside. Improved from a USDA strain by Dr. John Navazio, with lycopene content equal to tomatoes! Novelty appeal for farmer's market customers. *~18,000 seeds/oz.*

S \$3.00=0.5 g, *~300 seeds* **M** \$7.00=2 g, *~1200 seeds* **LG** \$15.00=14 g, *~9000 seeds* **XL** \$25.00=1 oz., *~18000 seeds* **8+ oz.** \$20.00/ oz. bulk rate

NEW! CT4 RODELIKA **Cert. BD/OG 72 days.** Improved Rothild bred by biodynamic farmer/breeder Dieter Bauer in Germany. Does well in heavy soil. A good storage variety with a very good flavor. *~18,000 seeds/oz.*

S \$3.00=1 g, sows 20 ft. **M** \$5.00=3.5 g, 70 ft. **LG** \$12.00=0.25 oz.

CT5 ROLANKA **Cert. BD/OG 75 days.** Aromatic rodelika type from Biodynamic breeding in Europe with excellent storage capacity, smooth skin and deep orange color, The photo is of carrots in April morning sun which had been stored through the winter. Even though they were from storage and were large, they still excellent quality texture and flavor. We use it for our year round CSA shares. Grown by NB. *~18,000 seeds/oz.*

S \$3.00=1 g, sows 20 ft., *~600 seeds* **M** \$5.00=4 g, 80 ft., *~2400 seeds* **LG** \$12.00=1 oz., 600 ft., *~18000 seeds*

CT6 SCARLET NANTES IMPROVED (*seed movement scarlet nantes*) **Cert. BD/OG 85 days.** Uniform, medium-long, blunt-tipped roots. Sweet and juicy and keeps its quality through a long season. We get many repeat customers for these carrots at the farmer's market and its excellent storage makes it possible for us to include it in our year round CSA. Grown by NB. *~18,000 seeds/oz.*

S \$3.00=1 g, sows 20 ft. **M** \$5.00=4 g, 80 ft.

CAULIFLOWER (*Brassica oleracea*) *~7,000 seeds/oz.*

CF1 CELESTA (*Celiano*) **Cert. BD/OG 80 days.** From Bingenheim Biodynamic breeding in Europe, an autumn cauliflower with good leaf cover. Transplant in May and harvest at the end of summer. Grown by BH. *~7,000 seeds/oz.*

S \$3.00 \approx 20 seeds, *~25 seeds* **M** \$7.85=0.5 g, *~125 seeds* **LG** \$18.00=2 g, *~500 seeds* **XL** \$48.00=0.25 oz.

NEW! CF3 NUAGE **Cert. BD/OG** Mid to late season vigorous develops strong plant slowly and the leaves cover the white well rounded heavy heads providing good blanching therefore is somewhat frost resistant in the late autumn as if finishes ripening. *~7,000 seeds/oz.*

S \$3.00 \approx 20 seeds **M** \$7.00=0.5 g, *~100 seeds* **LG** \$18.00=2 g, *~400 seeds* **XL** \$48.00=0.25 oz., *~2800 seeds*

CF2 ODYSSEUS **Cert. OG 70 days.** Small to medium-sized heads with white curds when blanched: tie leaves over forming heads to protect from the sun. Sturdy, compact plants, not self blanching therefore KEEP an eye on them when they are ripening and help them cover their heads. For best results, start in greenhouse then transplant outside. Cultivation instructions: Sow indoors 4 weeks before set out in May or early June. Prick out at true leaf stage to 1" apart .TP outdoors 18" apart. *~7,000 seeds/oz.*

S \$3.00 \approx 20 seeds **M** \$7.00=0.5 g, *~125 seeds* **LG** \$13.50=1 g, *~240 seeds*

CELERY & CELERIAC (*Apium graveolens*) *~75,000 seeds/oz.*

SALE! CE2 BRILLIANT CELERIAC Cert. **BD/OG** 100-110 days. Root with celery flavor. Delicious in winter soups, salads and baked dishes. Needs a long season and good soil to size up. Sow indoors about 12 weeks before transplanting, 6 seeds/in, 1/8" deep. Keep moist at 70-75 F. At true leaf stage, thin or prick out to 1-2" spacing. Set outside after danger of frost, 12" apart in rows 18" apart. Grown by RG. *≈50,500 seeds/oz.*

S \$3.00=0.15 g, *≈200 seeds* **M** \$6.00=0.5 g, *≈850 seeds* **LG** \$11.50=2 g, *≈3000 seeds* **XL** \$40.00=0.5 oz., *≈24000 seeds* **1 oz.** \$60.00=*≈48000 seeds*

CE1 MONARCH CELERIAC Cert. **BD/OG** 100-150 days. Productive scab resistant improved Giant Prague type matures fall to early winter. Large roots with firm white flesh. Celery root is a wonderful vegetable for the colder climates to have throughout the winter to add to soups, used like celery in stuffing, even grated for a Waldorf salad. It also makes a great cream of celery tasting soup without the fibers that would happen with stalk celery. Sow indoors about 12 weeks before transplanting, 6 seeds/in, 1/8 inch deep. Keep at an even temperature 70-75 F. At true leaf stage, thin or prick out to 1-2" spacing. Set outside after danger of frost, 12" apart in rows 18" apart. Then keep at no colder than 50 degrees. At the end of the season celeriac can stand some frost. Harvest before a hard freeze and store as cool as you do carrots around 35-40 degrees. At that temperature it should store until spring. Grown by NB. *≈50,000 seeds/oz.*

S \$3.00=0.15 g, *≈200 seeds* **M** \$6.00=0.5 g, *≈850 seeds* **LG** \$11.50=2 g, *≈3000 seeds* **XL** \$71.00=0.5 oz., *≈24000 seeds* **1 oz.** \$136.00=*≈48000 seeds*

CORN

SWEET CORN (*Zea mays*) 100-150 seeds/oz.

CS1 HARMONY Cert. **BD/OG** 90 days. A great, new cross from Wisconsin Biodynamic seed grower Steven Adams. Stalks between 7 and 8 feet depending on climate in which it is grown, often with multiple ears on a stalk, sweet good corn flavor with two toned colors of yellow and white. This variety did well in both wet and dry conditions. Still in early stages of development, we offer this for those interested in trying a new open pollinated variety. We would like to know how it does in your area. In warm, fertile soil, sow seeds 1 inch deep and 4 inches apart, in blocks of at least three rows spaced about 20 inches apart. Thin 8-12 inches apart. Grown by SA.

S \$3.00=1 oz., sows 40 ft., *≈120 seeds* **M** \$6.00=4 oz., 160 ft. **LG** \$17.00=1 lb **5+ lb** \$12.00/ lb bulk rate

POP CORN (*Zea mays*) 250 seeds/oz.

NEW! CN2 CHEROKEE RAINBOW Cert. **BD/OG** HEIRLOOM from Merlyn Niedens, combining several strains of long ear Cherokee popcorn sent to Southern Exposure Seed Exchange by Carl Barnes of Turpin, OK. Carl has helped save many of the Cherokee corns that came west over the Trail of Tears. This small kernelled variety makes surprisingly large pops, yielding for a low hull/ corn ratio. Great flavor. Highly ornamental, 5-7 in. ears have many shiny colors including red, blue, orange, white, and yellow with surprising variations. 6-8 ft. plants. We thank the First People's for the possibility to have corn.

S \$3.00=1 oz. **M** \$8.00=4 oz. **LG** \$15.00=1 lb **5+ lb** \$8.00/ lb bulk rate

CUCUMBERS

 (*Cucumis sativus*) ~1060 seeds/oz.

NEW! CU4 BONO Cert. **BD/OG** Selection of cucumber from Switzerland. Large, dark green, smooth-skinned fruits that do not need trellising. Grown by NB. *≈1,000 seeds/oz.*

S \$3.00=1 g, sows 25 ft., *≈30 seeds* **M** \$6.00=4 g, 100 ft., *≈120 seeds* **LG** \$10.00=0.5 oz., 400 ft., *≈420 seeds*

CU3 BOSTON PICKLER Cert. **OG** 55 days. Heirloom from the 1800's still worthy today with long vines and good yields of stubby green fruit and very hardy even in wet years. Excellent texture and flavor in pickles. Field was sprayed with the Biodynamic preparations. Grown by JT. *≈1,063 seeds/oz.*

S \$3.00=1 g, *≈70 seeds* **M** \$6.00=0.25 oz. **LG** \$9.00=1 oz. **XL** \$16.00=2 oz.

CU1 GREEN FINGER Cert. **BD/OG** Bred by Cornell University, this cucumber goes a long ways toward smooth skin cucumbers in the field. Mild flavor. Disease Resistance: Powdery Mildew, Papaya Ring Spot Virus, Watermelon Mosaic Virus, Zucchini Yellow Mosaic Virus Grown by NB. *≈1,063 seeds/oz.*

S \$3.00=1 g, ≈35 seeds **M** \$6.25=0.25 oz., ≈250 seeds **LG** \$15.00=1 oz., ≈1000 seeds **4+ oz.** \$9.00/ oz. bulk rate

CU6 MARKETMORE 86 **Cert. BD/OG 55-58 days.** Compact semi-bush type plants good for small gardens. 8-9 in. dark green fruits good for slicing or pickling. Very dependable production of non-bitter cucumbers from breeding by Dr Munger of Cornell University. One of Dr Munger's copious accomplishments! ≈1,063 seeds/oz.

S \$3.00=2 g, ≈70 seeds **M** \$6.00=14 g, ≈500 seeds **LG** \$10.00=2 oz., ≈2000 seeds **XL** \$45.00=1 lb

CU2 SHINTOKIWA **Cert. BD/OG 75 days.** Dark green 9-12 in. fruit. Outstanding texture and flavor. We never tired of eating these cucumber each day last summer. Grow on a trellis to avoid crooked fruits. Perfect for salads, sushi, etc. Introduced to this country by Japanese students attending the Rudolf Steiner College and given to biodynamic seed grower, Harald Hoven. A winner at the farmer's markets and CSA customers love them! Grown by NB. ≈1,063 seeds/oz.

S \$3.00=1 g, ≈40 seeds **M** \$5.00=0.25 oz., ≈250 seeds **LG** \$10.00=1 oz., ≈1000 seeds **2+ oz.** \$8.50/ oz. bulk rate

EGGPLANTS

(*Solanum melongena*) ~6,000 seeds/oz.

LG =0.25 oz., ≈1500 seeds

NEW! EG2 DIAMOND **Cert. BD/OG HEIRLOOM** Seed Savers Exchange acquired the seed of this eggplant variety from the Ukraine in 1993. Nine inch dark purple fruits which are on very vigorous early plants producing abundantly. ≈6,000 seeds/oz.

S \$3.00≈50 seeds **M** \$6.00≈200 seeds **LG** \$16.00

EG1 PING TUNG LONG **Cert. BD/OG 65-75 days.** Prolific and early bearer of long thin purple fruits up to 12 in. long with tender skin that does not need to be peeled before cooking. Delicious barbecued or broiled. Named for its native town of Ping Tung, Taiwan. Selected for many years in California by Harald Hoven. Very prolific for us in Nebraska and a favorite at the farmer's market. Sow indoors at 80-90F 8 weeks before setting out. Thin or prick out 2"-3" apart. Set out after danger of frost 18" apart in rows 30" apart. Grown by NB. ≈6,000 seeds/oz.

S \$3.00=0.25 g, ≈50 seeds **M** \$9.00=0.125 oz., ≈750 seeds **LG** \$16.00 **XL** \$49.00=1 oz., ≈6000 seeds

ENDIVE/ CHICORY

EN1 TREFFINE MARAICHERE **Cert. BD/OG 45 days.** This large frisee type endive is quite easy to grow and delightful in its delicate frilly appearance. It can stand a frost so it is great to have some greens for those early spring markets. Best grown for spring or fall harvest. Needs to be planted in early spring before the late spring heat. Grown by RG. ≈18,000 seeds/oz.

S \$3.00≈100 seeds, ≈100 seeds **M** \$6.00=0.125 oz., ≈2250 seeds **LG** \$10.00=0.5 oz., ≈9000 seeds **XL** \$34.00=2 oz., ≈36000 seeds

NEW! zu1 ZUCKERHUT CHICORY (*Sugar Hat*) **Cert. BD/OG 55-60 days.** A European type of hardy salad heads with thick leaves and a strong taste. Sow from mid-June to mid-July in order to harvest in the autumn and store into the winter time. Can be used with fruit or garlic to highlight its wonderful flavor. We do not usually find a way to get a bitter taste into our diet so zukerhut can help those of us who feel we need bitter flavors to find this addition to our cuisine. Withstands a light frost down to 25 degrees F or -4 Centigrade. Grown by SAT. ≈17,000 seeds/oz.

S \$3.00≈50 seeds **M** \$5.00=0.5 g, ≈300 seeds **LG** \$10.00=1 g, ≈600 seeds

FARM CROPS

PU2 PUMPKIN, STYRIAN, NAKED-SEEDED **Cert. BD/OG 90-120 days.** HEIRLOOM known from Styrian area in Austria where they are pressed for oil. Large, green/orange striped pumpkin grown for its seeds. Click on the photo to see inside the pumpkin. Seeds are delicious eaten raw or pressed for oil, or press for oil. Flesh can be used for soups but is also good for animals for animals. Extract the seeds from the pumpkins, rinse and dry seeds carefully; u on racks. ≈150 seeds/oz.

S \$3.00≈25 seeds **M** \$7.00=0.5 oz. **LG** \$18.00=2 oz. **8+ oz.** \$8.00/ oz. bulk rate

NEW! FL10 SUNFLOWER, PEREDOVIK (*Helianthus annuus*) **Cert. BD/OG 90-100 days.** HEIRLOOM Oil seed type from Russia with small black seed on 4 to 6 inch heads selected to be single flowered plants but still a few with multiple heads ≈880 seeds/oz.

S \$3.00=1 g, sows 12 ft., ≈25 seeds **M** \$7.00=14 g, 200 ft., ≈400 seeds **LG** \$10.00=1 oz., 400 ft., ≈880 seeds **XL** \$100.00=1 lb, 7000 ft., ≈14000 seeds

BULBING FENNEL (*Foeniculum vulgare*) ~7,000 seeds/oz.

FE1 PERFEKTION **Cert. BD/OG 75 days.** Delicious in salads and also in soups or in stir fries. Very mild flavor. Cultivation Instructions: Sow in the early spring or in end of June direct sow for an autumn harvest. If you sow in late spring it will probably bolt more easily as it nears the summer solstice. Water often like you would carrot seedlings until you see the first true leaves. ≈7,000 seeds/oz.

S \$3.00=0.25 g, ≈50 seeds **M** \$6.00=1 g, ≈200 seeds **LG** \$11.50=0.25 oz., ≈1600 seeds

FLOWERS

FL6 BACHELOR BUTTON, BLACK BALL **Cert. BD/OG** These sweet looking bachelor button flowers does not deserve to be black balled. Flowers are lovely and distinctive in bouquets with they dark purple hue almost assuming black. Great for inectories as well as being attractive in a salad with their feathery purple. Direct sow in autumn for early spring flowers or early in the spring frost hardy!

S \$3.00=1 g

FL7 LOVE-IN-A-MIST (NIGELLA) (*Nigella damascena*) **Cert. BD/OG** An old-fashioned flower from southern Europe sometimes called Fennel Flower because of its nutmeg-flavored seeds. Mixed flowers in shades of blue, pink, white, and purple, averaging 1 in. in diameter ≈10,000 seeds/oz.

S \$3.00=1 g **M** \$6.00=4 g **LG** \$10.00=0.5 oz., ≈5000 seeds **XL** \$20.00=2 oz., ≈20000 seeds

NEW! FL2 MORNING GLORY (*Ipomoea tricolor*) **Cert. BD/OG** Annual. Mix of 4-5 in. blue and purple flowers on vines. Blooms from July until frost, ope in early morning and closing after noon. Grown by NB. ≈1,200 seeds/oz.

S \$3.00=1 g, ≈40 seeds

FL15 NIGELLA, LOVE IN THE MIST **Cert. BD/OG** Delicate feathery blue or white flowers on 8-12 inch stems. Dried seed pods can be used in dried flower arrangements. The tiny black seed is also known as false cumin which smells like grape koolaid!

S \$3.00=1 g

FL9 POPPY, HUNGARIAN PURPLE BREAD **Cert. BD/OG** Beautiful bluish-purple flowers give way to attractive pods filled with poppyseed for baking. Pods can also be used in dried arrangements. Stake seed heads to prevent seed loss. Plant in late fall to very early spring. ≈95,000 seeds/oz.

S \$3.00=0.5 g, ≈1000 seeds

NEW! FL10 SUNFLOWER, PEREDOVIK (*Helianthus annuus*) **Cert. BD/OG 90-100 days.** HEIRLOOM Oil seed type from Russia with small black seed on 4 to 6 inch heads selected to be single flowered plants but still a few with multiple heads ≈880 seeds/oz.

NEW! FL3 ZINNIA, SCARLET **Cert. BD/OG** Medium large scarlet red flowers with yellow and brown middles. Really a stand out in bouquets at the market. Grown by NB.

S \$3.00=1 g, ≈80 seeds

GARLIC

GA3 CALIFORNIA EARLY-NEBRASKA SELECT Cert. BD/OG Available for ordering in the beginning of August 2016 SOFT NECK TYPE. Harder to peel than hardneck types but store better than hardnecks. Our strain stores until late spring of the following year after July harvest when stored in cool, dry conditions. They are an artichoke formation of cloves and have around 10-12 cloves so there are more plants possible per bulb than the hardneck varieties. For best results and to have nicely formed garlic bulbs, plant in autumn. We plant ours in mid October in Nebraska. We are zone 4. Plant cloves in October, 6-8 inches apart. Soft necks are best for milder winters but our strain has been selected to survive our cold, dry winters in western Nebraska. Another advantage to softneck garlics besides their long storage is that they can be braided. In general, mild climates are better off growing softnecks. But people where the winter's are colder like to have an acclimated softneck so that they can have garlic after the hardnecks are done storing in February. SHIPS SEPT through DEC 2015 Grown by NB.

S \$12.00=0.25 lb, sows 25 ft. **M** \$21.00=1 lb, 50 ft. **LG** \$48.00=3 lb, 100 ft. **XL** \$135.00=10 lb, 300 ft.

SALE! GA1 CHRYSALIS ROSE GARLIC Cert. BD/OG Available for ordering in the beginning August 2016 HARDNECK TYPE, has 7-9 large cloves per bulb and about 8 bulbs per pound. It is delicious with a robust garlic taste, and is easy to peel. For best results and nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We are zone 4. For best results and to have nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We plant ours in mid-October in Nebraska. We are zone 4. Estimate 8 bulbs per pound for Chrysalis Rose. Following from harvest HARDNECK TYPE, has 7-9 large cloves per bulb, is delicious with a robust garlic taste, and is easy to peel. Survives in severe winters. With every bulb, you can figure that you will have 7-8 garlic cloves for planting. After July harvest it stores for about five months best in cool dry conditions at around 40 degrees. . It is a favorite at our farmer's market. We obtained the seed from Steven Adams of Chrysalis Farm and EZ Farming, a 20 year old Wisconsin Biodynamic farm, and we have been maintaining it for many years. We recommend sowing the cloves in October about 6-8 inches apart in the row. SHIPS SEPT through DEC 2016. For best results and to have nicely formed garlic bulbs, plant in autumn. GA2 MUSIC ARIA Cert. BD/OG Available for ordering in the beginning of August 2016 SHIPS SEPT through DEC 2016. HARDNECK PORCELAIN garlic, a vigorous grower with usually 4-7 large cloves with good flavor. Great for the kitchen as there is not much peeling for a lot of garlic. There are about 5-6 bulbs per pound. With every bulb you get about 4-7 plants. Very easy to grow and a hardy type for severe winters. Our Music Aria garlic strain started with Al Music who brought it back from his homeland in Italy to Canada, and was further selected by Danielle LaBerge in Quebec, then passed on to Jean-David Derramaux who began the Healing Plant Gardens at Camphill Village USA in upstate New York in the 1990's. Now it has transferred itself to Nebraska and has done very well here. This garlic grows bigger than any garlic we have ever grown, yet maintains its great flavor.! It is truly outstanding in every way. SHIPS IN SEPTEMBER 2016. Grown by NB.

S \$17.00=0.5 lb, sows 10 ft. **M** \$22.00=1 lb, 18 ft. **LG** \$55.00=3 lb, 50 ft. **XL** \$150.00=10 lb, 165 ft.

S \$3.00=0.3 g, sows 15 ft., ≈100 seeds

LK1 KING RICHARD **Cert. BD/OG 75 days.** Fast-growing summer leek. The thick white shafts can reach 12 in. in length. Light-green upright leaves, mild flavor. Sow inside 8-10 weeks before setting out, 1" apart and " deep. Transplant outdoors in late spring when pencil thick 6" apart, in rows 24" apart. Hill plants with soil 2 or 3 times during season. Grown by NB. ≈10,000 seeds/oz.

S \$3.00=0.5 g, sows 20 ft., ≈150 seeds **M** \$6.00=3 g, 80 ft., ≈600 seeds **LG** \$11.00=0.25 oz., 300 ft., ≈2400 seeds

NEW! LK4 KING SIEG Cert. BD/OG We are interested to offer this new work of art bred by Beth Rasgorshek of Canyon Bounty in Idaho. King Richard leek crossed with Siegfried Frost leek to produce a blue green type with medium long thick shanks and perhaps more hardiness than King Richard which is a summer leek. Grown by NB.

S \$3.00=0.5 g, sows 20 ft., ≈150 seeds **M** \$6.00=3 g, 80 ft., ≈600 seeds **LG** \$11.00=0.25 oz., 300 ft., ≈2400 seeds

LETTUCE (*Lactuca sativa*) ~24,000 seeds/oz.

LETTUCE, ROMAINE

LT8 CIMMARON Cert. BD/OG 65 days. HEIRLOOM . Antique, deep red, almost burgundy Romaine lettuce dating from the 18th century with large loose heads. Grown by NB.

S \$3.00=0.5 g, sows 25 ft., ≈400 seeds **M** \$8.00=4 g, 200 ft., ≈3200 seeds **LG** \$14.00=0.5 oz., 660 ft., ≈1200 seeds

LT3 KALURA Cert. BD/OG 57 days. Very large Cos-type green Romaine. Great taste and good heat tolerance. 1/8 gram sown in a greenhouse and transplanted will produce 25-50 heads of lettuce. Grown as a head it can be harvested young crisp with a closed light head or later with a heavy succulent and crisp giant head. Customers are wowed either way! Sorry we did not photograph it. We harvested hundreds of them for our CSA and people are anxious for spring so they can taste them again. Grown by NB.

S \$3.00≈200 seeds, sows 6 ft., ≈200 seeds **M** \$5.00=1.5 g, ≈1200 seeds **LG** \$9.00=7 g, ≈6000 seeds

LETTUCE, BATAVIAN (FRENCH CRISP)

LT2 DEER TONGUE, GREEN Cert. BD/OG 50 days. HEIRLOOM from . Dark green leaf lettuce matures to petite tight cylindrical heads with crisp creamy yellow hearts surrounded by long pointed outer leaves. It is delicious cut in half and drizzled with garlic salad dressing. Best in spring and autumn plantings. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart. Grown by NB.

S \$3.00=0.5 g, sows 25 ft., ≈400 seeds **M** \$7.50=4 g, 200 ft., ≈3200 seeds **LG** \$13.00=0.5 oz., 660 ft., ≈1200 seeds **XL** \$22.00=1 oz., 1320 ft., ≈24000 seeds

LTB VICTORIA Cert. BD/OG 55 days. Batavian type with heavy upright heads, dark-green leaves and a good thick heart in the center. Good holding power in heat, yet hardy. For spring through late fall. Grown by NB.

S \$3.00=0.5 g, ≈400 seeds **M** \$6.00=4 g, ≈1600 seeds **LG** \$12.00=0.25 oz., ≈3000 seeds **XL** \$20.00=0.5 oz., ≈12000 seeds

LETTUCE, BUTTERHEAD/BIBB

SALE! LT1 MIKOLA Cert. BD/OG 49 days. Medium sized Butterhead with succulent inner core and slightly-ruffled outer leaves with light purple tinge on the edges. Does well in summer heat. Easy to grow and dependable for market gardeners. Grown by NB.

S \$3.00=0.5 g, sows 25 ft., ≈400 seeds **M** \$6.00=4 g, 200 ft., ≈3200 seeds **LG** \$13.00=0.5 oz., 660 ft., ≈1200 seeds **1+ oz.** \$20.00/ oz. bulk rate

LETTUCE, LOOSE-LEAF

LT9 NEW RED FIRE Cert. BD/OG 45 days. Dark-red leaf lettuce, ruffled leaves, semi-heading, slow to bolt, holds its color well under difficult conditions. Grown by NB.

S \$3.00=0.5 g, ≈400 seeds **M** \$5.00=2 g, ≈1600 seeds **LG** \$11.50=0.25 oz., ≈6000 seeds

SALE! LT6 RED TINGED WINTER (Lattughino) **Cert. BD/OG 60 days.** Hardy to -5 F. Fall plant for early spring heads. Gets bitter in hot weather. Great for overwintering. Good for heads or for cutting for salad mix. First lettuce ready in the spring if sown or transplanted outside in autumn or in a greenhouse in winter. Great for a year round CSA offering! Our members can hardly wait for this in the early spring along with the overwintered spinach. Grown by NB.

S \$3.00=0.5 g, sows 25 ft., ≈400 seeds **M** \$7.50=4 g, 200 ft., ≈3200 seeds **LG** \$14.00=0.5 oz., 660 ft., ≈12000 seeds **XL** \$24.00=1 oz., 1320 ft., ≈24000 seeds

LETTUCE, OAK LEAF

NEW! LTO3 PASHA **Cert. BD/OG** Beautiful oak leaf yet rounded leaves to give it a very dignified appearance. Very beautiful heads at the market and in salads as well as delectable!

S \$3.00≈100 seeds **LG** \$7.75=1 g, ≈800 seeds

NEW! LTO4 STRUBEL PETER **Cert. BD/OG HEIRLOOM from Switzerland** . Strubel Peter refers to a story first published in 1845 about boy with curly and unruly hair 'adventuring' through his life.. Nevertheless, we find this good tasting green oak leaf though curly leafed, decidedly neat and trim looking as well as delicious!.

S \$3.00≈100 seeds **M** \$7.50=1 g, ≈800 seeds

OL2 YEAR ROUND BRONZE OAK **Cert. BD/OG 40-45 days.** This delicious oak leaf variety was developed by Harald Hoven out of Lingue de Canarino. It forms large, sweet, fast-growing heads that are late to bolt. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart. Grown by RG.

S \$3.00=0.5 g, sows 25 ft., ≈400 seeds **M** \$6.00=4 g, 200 ft., ≈3200 seeds **LG** \$12.00=0.5 oz., 660 ft., ≈12000 seeds **XL** \$20.00=1 oz., 1320 ft., ≈24000 seeds

MELONS / CANTALOUPE (Cucumis melo) ~1100 seeds/oz.

ME1 DELICIOUS 51 PMR **Cert. BD/OG 82 days.** A northern variety with powdery mildew resistance bred in by Dr Mungler and the team at Cornell Univ. Early 4-5 lb. round-oval fruit, well netted with sweet salmon-orange flesh. Excellent flavor and texture. The green line just inside the skin is an indication of a sweet cantaloupe. People line up at our farmer's market to buy this wonderful tasting variety. Sow after all danger of frost is past and soil is warm, 1/2" deep in rows 4'-6' apart, thinning to 12" apart, or in hills 4'-6' apart, 3 seeds/hill. Transplants: Start indoors 3 weeks before last frost at 80-90 F. Grown by NB. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈35 seeds **M** \$5.50=0.25 oz., ≈275 seeds **LG** \$8.40=1 oz., ≈1100 seeds **4+ oz.** \$7.50/ oz. bulk rate **1 lb** \$60.00

ME3 ICE CREAM, GREEN FLESHED (GREEN MACHINE) **Cert. BD/OG 80 days.** Sweet, prolific light green fleshed melon bred by Merl Neidens. . It is a cross between heirloom Jenny Lind and Kansas melon varieties. The flesh is green with orange on the very inside next to the seed cavity. According to Biodynamic grower Steven Adams, the flavor is absolutely exquisite: It's terrifically sweet and, has a very soft, smooth texture. For Steven in Wisconsin, it produced 20-25 fruits per moderate vine. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈35 seeds **M** \$7.00=0.25 oz., ≈250 seeds **LG** \$9.00=1 oz., ≈1000 seeds

ME2 SHARLYN **Cert. BD/OG 95 days.** Sometimes considered a honeydew, Sharlyn's oval fruits are somewhat netted when mature. Juicy pale green flesh has a great flavor. California grower Harald Hoven says it performs best in milder climates with a sweet smell as well as taste, Grown by RG. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈30 seeds **M** \$6.00=0.25 oz., ≈250 seeds **LG** \$10.00=1 oz., ≈1100 seeds **2+ oz.** \$8.00/ oz. bulk rate

OKRA (Abelmoschus esculentus) ~475 seeds/oz.

SALE! OK1 CLEMSON SPINELESS **Cert. BD/OG 60 days. HEIRLOOM from** . Heirloom from 1939 All American selections. Hardy type for the north! Tall plants with large flowers followed in 5 days by tender pods that keep producing until frost. Harvest every 2-3 days when 2" long. Pod tips will snap off if tender and bend if woody. Pods

are great in soups or stews. Grown by Lunquist CSA Biodynamic Farm in eastern Nebraska Grown by EL. ≈500 seeds/oz.

S \$3.00=3 g, ≈48 seeds **LG** \$11.00=1 oz., ≈475 seeds **2+ oz.** \$5.00/ oz. bulk rate

SHIPPING INCLUDED IN BULK PRICE

ONIONS *(Allium cepa)* ~6,500 seeds/oz.

ON1 BENNIE'S RED Cert. BD/OG 108 days. Very good round storage onion with deep purple-red skin and pinkish-white interior. From our select seed stock. We are working to bring back this excellent Long-day variety. Grown by AM. ≈6,500 seeds/oz.

PARSLEY (*Petroselinum crispum*) *~16,000 seeds/oz.*

PA1 MOSS CURLLED, FOREST GREEN **Cert. BD/OG 75 days.** Vigorous, productive compact 12 in. tall plants with dark-green finely-cut, deeply-curved leaves. A high-yielding uniform strain. In the begging, can take 2-3 weeks to germinate. Cultivation Instructions: Can be planted at all times of year but germinates best in the cooler time. Best sown directly into soil outside spring or autumn. Keep well watered. Do not let it dry out until signs of germination around 2-3 weeks. From transplanting, roots tend to rot later in the season that is why it is best to sow direct outside. Parsley is winter hardy even in cold climates. However it is a biennial so early in the spring, the leaves can be harvested but later in the spring the parsley plants shoot to seed. Grown by NB. *≈14,000 seeds/oz.*

S \$3.00=1 g, *≈450 seeds*

PARSNIPS (*Pastinaca sativa*) *~5,000 seeds/oz.*

PN3 AROMATA **Cert. BD/OG** Smooth texture and sweet. Roots are not real long so a bit easier to harvest than the cobham marrow. *≈6,000 seeds/oz.*

S \$3.00=1 g, sows 15 ft.

PN1 COBHAM IMPROVED MARROW **Cert. BD/OG 120 days.** High quality smooth tapered white roots with high sugar content and a mild coconut flavor. Cultivation instructions: Sow early to mid-spring 1/2" deep, 3 seeds per inch in rows 15"-18" apart. Thin to 3"-4" apart. Keep moist until seedlings emerge, which may take 3 weeks. Harvest in fall or overwinter for early spring harvest. If allowed to overwinter they become very sweet!!! Grown by NB. *≈6,000 seeds/oz.*

S \$3.00=2 g, sows 30 ft., *≈400 seeds* **M** \$6.00=7 g, 100 ft., *≈1400 seeds* **LG** \$11.50=0.5 0.5 oz., 200 ft., *≈2800 seeds*

PEAS *~125 seeds/oz*

SNAP PEAS (*Pisum sativum*)

SP1 SUGAR LODGE **Cert. BD/OG 65 days.** Pods sweeten slowly and gradually have an excellent sugary flavor in the fully developed pods. Eat the whole pod!!! No shelling needed. Plants hold up well in heat. Good yields! Plant 1 inch deep and 2 inches apart. Peas can tolerate frost and snow! Grown by NB.

S \$3.00=0.5 oz., sows 5 ft., *≈60 seeds* **M** \$5.00=2 oz., 20 ft., *≈240 seeds* **LG** \$20.00=1 lb, *≈1920 seeds* **2**

b \$30.00=*≈3840 seeds*

bulk rate

RD3 DAIKON, MIYASHIGE **Cert. BD/OG** Juicy and flavorful, can be used fresh in salads, cooked in vegetable dishes, pickled, used in kim chee, or grated and mixed with ginger and soy sauce to make a dip. Also used as a tenacious cover crop. Usually harvested when 12 in. long and 2-3 in. in diameter, though it will grow much larger! *≈2,500 seeds/oz.*

S \$3.00=2 g, *≈150 seeds*

SALE! RD2 SORA **Cert. BD/OG 28 days.** Early spring as soon as the soil can be worked since radishes can stand some frost. For radishes in 28 days. Consistent in size with good taste. Best sown when it is cool. Sow every 10 days for a continuous supply. Can be sown in the early autumn too. Can get quite large without sponginess. Sow 1/2" deep and 1" apart in rows 6"-12" apart. *≈2,500 seeds/oz.*

S \$3.00=4 g, sows 10 ft., *≈350 seeds* **M** \$6.25=1 oz., 80 ft., *≈2500 seeds* **LG** \$9.80=2 oz., 150 ft., *≈5000 seeds* **XL** \$33.00=8 oz.

RUTABAGA

NEW! RT1 JOAN **Cert. BD/OG** Joan is a rutabaga which is like a turnip but it is yellow orange and stores all winter long. Joan is in fact one of the best rutabagas for flavor and over all texture. Sow outside beginning in July at least 50 days before your first autumn frost and keep moist until germinated in the summer heat. Thin to 3 inches in rows at least 12 inches apart. Grown by NB. *≈7,500 seeds/oz.*

S \$3.00=1 g, *≈200 seeds* **M** \$6.00=4 g, *≈800 seeds* **LG** \$10.00=14 g, *≈6000 seeds* **XL** \$15.00=1 oz., *≈12000 seeds* **4+ oz.** \$12.00/ oz. bulk rate

NEW! RT2 WILHELMSBERGER SWEDE **Cert. BD/OG** An heirloom type of rutabaga from Europe. Hardy down to 24 degrees F. Sow outside begin in July or at least 50 days before your first fall frost. Keep moist until germed in the summer heat. Thin. Grown by BH. *≈7,500 seeds/oz.*

S \$3.00=1 g, *≈200 seeds* **M** \$6.00=4 g

SHALLOTS

SH1 DUTCH GOLD BULBS (french froglegs) **Cert. BD/OG** There are two ways to use these shallots. First possibility: You can plant them in the autumn or spring for early scallions and harvest. Scallions from Shallot bulbs are ready to harvest in early spring so they bridge the need for onions well. Second possibility is harvesting the bulbs in the autumn, and using them through the winter. Dutch Gold has a beautiful golden copper skin which protects the sweetest flavor of one of the longest storing shallots available. Whenever I use these shallots in scrambled eggs my friends say these are the best scrambled eggs I have ever eaten. Let me tell you; Its not the eggs! These shallots bring alive any dish in which you use them, says biodynamic/organic grower Brian Wickert who was the original source for these shallots.. Plant in early spring, harvest in July. Or plant in the autumn and harvest as early spring scallion-like shallots. They size up very fast in the spring and are like spring scallions. Plant 2 bulbs per foot for larger bulbs and space rows 18-24 inches apart. On the average, this year there are approximately 50 bulbs per pound. Plant the sets 1 inch deep with root plate down if possible. However, adequate yields can be obtained from randomly dropping the planting stock. Use 200-300 lb of planting stock per acre. They may be planted in fall 1 diameter at harvest. Allow to dry and cure in bins or netted sacks under cover. Under proper storage conditions they will last for 5-7 months. Grown by NB.

S \$23.99=1 lb **M** \$84.45=5 lb **LG** \$135.00=10 lb **XL** \$269.75=25 lb

SPINACH

(*Spinacia oleracea*) *≈2,150 seeds/oz.*

SS2 ABUNDANT Cert. BD/OG A spinach variety adapted to organic farming conditions that is slow bolting and cold-hardy, and has upright growth habit and deeply savoyed (crinkled) dark green leaves. From research of Organic Seed Alliance. $\approx 2,000$ seeds/oz.

S \$3.00=2 g **M** \$5.00=7 g **LG** \$10.50=2 oz.

S1 BUTTERFLAY Cert. BD/OG 45 days. Vigorous early spinach with medium dark-green savoyed leaves and a full rich flavor. Quick-growing and late-bolting. Very dependable in the spring and has overwintered nicely here in Nebraska with protection of hay bales to the north of the bed. Temperatures here can be -30 below F this past winter and it still overwintered. It rivals many hybrid varieties because it is from Biodynamic breeding and selection in Switzerland and Germany. Cultivation instructions: Very early springlant successions every 7-10 days, 1/2" deep and 1" apart in rows 12"-15" apart. For fall and winter sow late summer until 6 weeks before 20 F nights. For 25 pounds or more, call for prices. Grown by BH. $\approx 2,150$ seeds/oz.

S \$3.00=4 g, sows 30 ft., ≈ 300 seeds **1 oz.** \$5.00=200 ft., ≈ 2000 seeds **25 lb** \$500.00 **4 oz.** \$10.00=800 ft., ≈ 8000 seeds **1 lb** \$36.00=3200 ft., ≈ 128000 seeds **5+ lb** \$29.00/ lb bulk rate

GR1 KOMATSUNA (Spinach Mustard) Cert. BD/OG 45 days. NOT in the Spinach family. Tender mild glossy dark-green leaves up to 12 in. long. Sown like spinach, but germinates more quickly, especially in a cold season. Does not have oxalic acid as is found in regular spinach, making it preferred by some people to regular spinach. Grown by NB. $\approx 12,500$ seeds/oz.

S \$3.00=0.5 g, ≈ 200 seeds **M** \$6.00=0.25 oz., ≈ 3000 seeds **LG** \$9.00=0.5 oz., ≈ 6000 seeds

SUMMER SQUASH *(Cucurbita pepo)*

NEW! ZU3 RHEINAU GOLD ZUCCHINI Cert. BD/OG Gold zucchini squash selected by the Biodynamic Seed Company in Rheinau Switzerland. Thick flesh and skin., with very good flavor. Does throw about 5 percent green zucchinis. They sell very well at the farmer's market here in Nebraska. People like their texture too. Grown by NB. ≈ 250 seeds/oz.

S \$3.00=2 g, ≈ 15 seeds **M** \$6.00=1 oz., ≈ 250 seeds **1 lb** \$60.00

SS2 VERDE CHIARO D'ITALIA Cert. BD/OG 48 days. Light green Italian zucchini with cylindrical fruit which are early and productive with a good taste. Abundant blossom production as well. Grown by RG. ≈ 250 seeds/oz.

S \$3.00=0.125 oz., ≈ 25 seeds **M** \$6.00=0.5 oz., ≈ 100 seeds **LG** \$9.00=1 oz., ≈ 250 seeds

SS1 ZUCCHINI DARK GREEN SELECT Cert. BD/OG 52 days. This open pollinated zucchini performs as well if not better than the hybrids we have trialed. Our Dark Green Select is is very green and has been a constant at our farmer's market every summer. While succession plantings can be done, our dark green lasts until the first hard frost in September or October. We personally selected this variety for field resistance in the difficult wet climates of eastern US where there cucumber beetles bring bacteria wilt. Our work is inspired by Raoul Robinson, a stellar Canadian breeder who wrote "RETURN TO RESISTANCE". Our selected strain of this zucchini is dark green, with smooth fruits and firm white flesh with good taste raw or cooked. We rely on Dark Green's production for our farmer's market here in Nebraska all season long. Grown by NB. ≈ 250 seeds/oz.

S \$3.00=0.125 oz., ≈ 25 seeds **M** \$6.00=1 oz., ≈ 250 seeds **8+ oz.** \$4.50/ oz. bulk rate **1 lb** \$40.00

WINTER SQUASH *(Cucurbita spp.)*

WS2 ACORN, SWEET REBA Cert. BD/OG One of the best of the bush acorns. High yielding green-skinned (4-5 fruits/plant) with a good sweet flavor. Bred by Cornell University. Resistant Early Bush Acorn (REBA) lives up to its name as it yields well even in wet climates where disease challenges abound for the pepo types of squash. Does great in our semi-arid climate too. Grown by NB. ≈ 312 seeds/oz.

S \$3.00=0.125 oz., ≈ 35 seeds **M** \$7.00=0.5 oz., ≈ 150 seeds **LG** \$13.00=1 oz., ≈ 300 seeds **2+ oz.** \$9.50/ oz . bulk rate

NEW! MX1 BLUE BALLET JSS SELECT Cert. BD/OG Delicious and the best of the small hubbard types with deep orange flesh and Blue-green skin. Fits easily into the oven and stores into late spring Very delicious. Bred by Johnny's Selected Seeds. We are grateful to have permission from JSS to grow this variety out Biodynamically. If you plan to grow this for seed production, we recommend that you speak with Rob Johnstan at Johnny's Select Seeds to

ask permission. It is always best to ask the breeder for permission for stock seed since makes sure to keep the seed variety uncontaminated. ≈85 seeds/oz.

S \$3.00≈10 seeds, sows 10 ft. **M** \$11.00=1 oz., 85 ft., ≈85 seeds

WS8 BUTTERNUT (*C. moschata*) **Cert. BD/OG 100 days.** Long, light-tan bottle shaped winter storage variety. Finely-grained golden-orange flesh is deliciously sweet and good for pie. For US east coast growers, most resistant squash-type to bacterial wilt. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by RG. ≈300 seeds/oz.

S \$3.00=3 g, ≈35 seeds **M** \$6.50=0.5 oz., ≈150 seeds **LG** \$9.00=1 oz., ≈300 seeds

NEW! SALE! WSP1 DELICATA (*C. pepo*) **Cert. BD/OG 100 days.** 7-9x3 in. light tan oblong cylindrical fruit with green/orange stripes. Creamy sweet orange flesh. Short term storage. Delicious!. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by SA. ≈460 seeds/oz.

S \$3.00=3 g, sows 25 ft., ≈50 seeds **M** \$6.00=0.5 oz., 100 ft., ≈200 seeds **LG** \$11.50=1 oz., 225 ft., ≈460 seeds **2+ oz.** \$7.50/ oz. bulk rate **1 lb** \$44.00=3200 ft.

WS7 HONEYNUT (*cucurbita moshata x maxima*) **Cert. BD/OG** The rave reviews from our CSA customers of the flavor were almost unanimous. These mini 4-5 inch butternut are very high in sugar content. They are green before their ripening finishes then they turn a buff color just like their relative: .regular butternut squash. Not a storage type! This is our first year growing them and we found that they stored only into December but they are definitely worth having early in the autumn. Customers cannot get enough of them. Bred by Cornell University with some resistance to powdery mildew which is prevalent in the eastern US. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by NB. ≈300 seeds/oz.

S \$3.00=3 g, ≈30 seeds **M** \$9.50=0.5 oz., ≈150 seeds **LG** \$13.50=1 oz., ≈300 seeds

WS5 KINDRED ORANGE BUTTERCUP (*C. maxima*) **Cert. BD/OG 90 days.** Early buttercup with turbaned 3-5 Lb. fruits ripening to a reddish-gold. Golden-yellow flesh. Vining plants. This petite buttercup is an optimum size for a two person serving. Earliest ripening maxima squash that we know of. Has been sought by cold climate gardeners in Alaska because it is one of the few varieties which will ripen there. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by SA. ≈150 seeds/oz.

S \$3.00=5 g, ≈25 seeds **1 oz.** \$7.00≈150 seeds **4+ oz.** \$6.00/ oz. bulk rate

NEW! WS9 NUTTER BUTTER **Cert. BD/OG** Developed by High Mowing's Jodi Lew-Smith, it is a quick ripening squash with a sweet nutty flavor and absolutely delicious. This is a great breeding feat. We asked for permission to grow this wonderful squash to seed with Biodynamic methods. We recommend when someone has developed a new variety that permission is asked from the developer if you want to do seed growing of the variety. This helps to maintain what has developed in the particular variety.

S \$3.00≈10 seeds, ≈10 seeds **M** \$18.00=1 oz., ≈300 seeds **LG** \$38.00=4 oz., ≈1200 seeds

WS6 RED KURI (*C. maxima*) **Cert. BD/OG 95 days.** Beautiful red-orange 5 pound tear-drop shaped fruits make a colorful addition to the autumn harvest. Baked or in pies. Grown by RG. ≈150 seeds/oz.

S \$3.00=4 g, ≈20 seeds **M** \$6.00=0.5 oz., ≈75 seeds **LG** \$9.00=1 oz., ≈150 seeds **XL** \$45.00=1 lb, ≈2000 seeds **2+ oz.** \$6.50/ oz. bulk rate≈300 seeds

WS1 STELLA BLUE **Cert. BD/OG** Its outstanding flavor and excellent storage through the whole winter stood out in our squash trials last year. Deep thick orange flesh and light bluish green skin of 4-6 inch high, 10-12 inch wide disks with little or no buttoning on the base. Original seed from Bill Reynolds. Grown by NB. ≈85 seeds/oz.

S \$3.00=8 g, ≈25 seeds **M** \$6.50=1 oz., ≈150 seeds **LG** \$12.00=2 oz., ≈300 seeds

NEW! SALE! WSP2 THELMA SAUNDERS (sweet potato) **Cert. BD/OG 85-90 days.** HEIRLOOM originally from Thelma Sanders of Kirksville, Missouri. The seed was passed from Evert Pettit to Sue and Tom Knoche who were Ohio squash collectors. . Blond skin and creamy golden flesh. Best tasting acorn ever, slightly larger fruits and outstandingly prolific. Thelma herself state that this squash was better than sweet potatoes with its nutty flavor Stores better than most acorns. Sow outside in rows or hills after danger of frost is past and soil has warmed,

sow 1/2"-1" deep, 4" apart in rows 4' to 6' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 4'-6' apart. ≈250 seeds/oz.

TM11 JAUNE FLAMME Cert. BD/OG HEIRLOOM from France . Delicious small yellow/orange small fruits 2-3 ounces, very prolific. Cultivation instructions: Sow inside 6 wks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Stake or cage indeterminate varieties for best results. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds

TM4 MATT'S WILD Cert. BD/OG 65-70 days. Indet. Everyone should have at least one plant of these in their garden. This little grape-sized red cherry tomato is packed with sweet, juicy flavor and is a quick favorite for all who try it. Children love it! Germinates best at a constant 78 degrees. Once germinated, we found the plants remained

healthy even in cool wet climates. Produces beautiful trusses of ripe fruit which can be harvested complete for farmer's markets. It stores better and is very attractive when the whole truss is clipped, instead of picking individual tomatoes. Teresa Arellanos de Mena from Hildago in eastern Mexico collected and shared this variety with her friend and colleague, Matt Liebman of the U. of Maine Ag School, who saved seeds and passed them on to Johnnys Selected Seeds. We are grateful to Johnnys for permission to offer this variety, and to Teresa and Matt who collected and saved it. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds

NEW! TMG1 PILU Cert. BD/OG Three oz red fruits bred in Europe for the greenhouse with sweetness and good disease resistance. Indicated from the European company: *Fusarium oxysporum* f. sp. *lycopersici* (Fol 0,1) *Cladosporium* (Samtflecken) (Ff 1-5). Even though they are small they are full of flavor! Grown by NB.

S \$3.00≈20 seeds
