

BEANS

BUSH BEANS (*Phaseolus vulgaris*)

NEW! BN6 DRAGON TONGUE (*phaseolus vulgaris*) Cert. BD/OG Bush wax romano (flat and wider) bean, light yellow with purple stripes which don't remain after cooking. Crisp wide pods which are juicy. Delicious! Grown by NB.

S \$3.00=1 oz. **4+ oz.** \$2.75/ oz. bulk rate

BN2 GOLDEN ROCKY (*phaseolus vulgaris*) Cert. BD/OG 55 days. Tender yellow wax bean. Good producer on compact plants. Grown by NB.

S \$3.00=1 oz., sows 20 ft., ≈100 seeds **M** \$20.00=1 lb **LG** \$100.00=10 lb **4+ oz.** \$2.75/ oz. bulk rate **4+**

b \$18.00/ lb bulk rate

BNBD1 PROVIDER SELECT (*phaseolus vulgaris*) Cert. BD/OG 50 days. This variety has been the measuring stick for all good green snap-bush beans for many years. We are excited to offer Provider from Tiensvold Farm. They farm 3000 acres, have been certified organic for over 25 years. Grown by TVF.

S \$3.00=1 oz., sows 4 ft., ≈98 seeds **20 lb** \$140.00 **4+ oz.** \$2.75/ oz. bulk rate **1 lb** \$18.00 **5+ lb** \$15.00/

lb bulk rate

NEW! BN5 ROYAL BURGUNDY (*phaseolus vulgaris*) Cert. BD/OG 50-60 days. Long, tender purple beans turn green when cooked. Grown by NB.

S \$3.00=1 oz. **4+ oz.** \$2.75/ oz. bulk rate

POLE BEANS (*P. vulgaris*)

BP5 EARLY RISER (AKA: *Kwintus, phaseolus vulgaris*) Cert. BD/OG 55 days. Early Romano-type pole bean. Flat, 9 in. long pods. Vigorous vines to 10 ft. Does well in the North. Sow after last frost in warm soil. 1" deep, 3" apart, or grow on poles or tipis placing 5-6 seeds at the base of each pole. Climbs 6-8 ft. Grown by NB.

S \$3.00=1 oz., sows 10 ft., ≈60 seeds **M** \$7.50=4 oz., 40 ft., ≈230 seeds **LG** \$20.00=1 lb, 160 ft., ≈900 seed

s

BP1 RATTLESNAKE (*phaseolus vulgaris*) Cert. BD/OG 70 days. Purple streaked dark green pods on 8-10 foot vines notable for their good flavor. These unusual beans catch the customer's eye at the farmer's market and when cooked look like other green beans. Their brown striped seeds, reminiscent of pinto beans, can also be used as a dry bean. Grown by NB.

S \$3.00=1 oz., ≈70 seeds **LG** \$25.00=1 lb, ≈1100 seeds **4+ oz.** \$2.75/ oz. bulk rate

SOUP BEANS (*P. vulgaris*)

NEW! BS1 BARB'S BEAUTIFUL BEANS (*phaseolus vulgaris*) Cert. BD/OG HEIRLOOM. Maroon and white beans with very distinctive markings great for soups. Also known Yin Yang or Calypso. Grown by NB.

S \$3.00=1 oz.

BS4 BLACK TURTLE (*phaseolus vulgaris*) Cert. BD/OG 85-105 days. Bushy plants with good yields of small black beans. Makes delicious soup, baked beans or bean spread.

S \$3.00=1 oz. **4+ oz.** \$2.75/ oz. bulk rate

NEW! BS5 BLUE TEPARARY (*TEPERARY, Phaseolus acutifolius*) Cert. BD/OG 80 days. A traditional Southwestern crop that's drought and heat tolerant. Has a half-runner habit. *Phaseolus acutifolius* Grown by NB.

S \$3.00=0.5 oz.

NEW! BS2 BUCKSKIN (*phaseolus vulgaris*) Cert. BD/OG 85 days. HEIRLOOM. Abundant production and early. Somewhat sprawling with runners but do not need trellis. Eating quality similar to Pinto when cooked. Golden tan color. Grown by NB.

S \$3.00=1 oz.

BEETS

(*Beta vulgaris*) ~2,200 seeds/oz.

NEW! BT4 BADGER TORCH Cert. BD/OG Beautiful elongated golden beet with reddish-gold zoning highlight streaks in the roots and yellow stems in leaves make this of possible interest to restaurants. Pleasant mild, sweet raw or cooked. Introduction by University of Wisconsin, bred by Irwin Goldman. Beet seed embryos do not form well in heat so in order to grow this seed out in our hot dry Nebraska summers, we have put a lot of research and work into figuring out as well as paying royalties to the University of Wisconsin. Therefore we are charging more to support those expenses. Grown by NB. ~2,200 seeds/oz.

S \$6.00=1 g, ~50 seeds **M** \$56.00=10 g, ~500 seeds

BT8 FEUER KUGEL (fire ball) Cert. BD/OG 60-65 days. **HEIRLOOM** from . Switzerland. Smooth round roots. Skin slips off easily when cooked. Remains sweet and tender to a large size. Has natural zoning in some beets which means there are some white concentric circles in the inner part of the beet in many of the beets which also makes it especially sweet. Stores well. Grown to seed by long time Biodynamic grower Heike Maria Eubanks. ~2,200 seeds/oz.

S \$4.00=1 g, ~60 seeds **M** \$9.00=7 g, ~400 seeds **LG** \$25.00=1 oz., ~1500 seeds

BTG1 GOLDEN TOUCHSTONE Cert. BD/OG This is one of the bests golden beets around Beets are with orange skin and golden yellow flesh with shiny green leaves. ~1,400 seeds/oz.

S \$4.00=1 g, ~45 seeds **M** \$8.00=6 g, ~260 seeds **LG** \$21.00=1 oz., ~1400 seeds

NEW! BT2 LUTZ GREEN LEAF Cert. BD/OG 65-70 days. Sweet tender somewhat heart shaped roots are good winter keepers. Big tender glossy green tops with midribs are delicious. With both tasty roots and leaves, this is a winner. Our strain is one of the most true to type for Lutz. **OUTSTANDING** sweet flavor. Grown by SA. ~700 seeds/oz.

S \$4.00=2 g, ~60 seeds **M** \$9.00=8 g, ~240 seeds **LG** \$25.00=1 oz., ~700 seeds

BT1 ROBUSCHKA Cert. BD/OG 60-65 days. Vigorous plants with strong tops. Round, smooth-skinned roots are dark red throughout. Selected for its sweet fruit-like taste, it is excellent cooked, grated raw, juiced, pickled or processed. It has been given taste test first place in the Organic Seed Alliance reviews. Similar in appearance to Detroit red. Sow from early spring to mid-summer 10 seeds/ft, " deep, in rows 12-24" apart. Thin to 4" between plants. Grown by BH and SAT. ~2,200 seeds/oz.

S \$4.00=0.5 g, sows 5 ft., ~25 seeds **M** \$8.00=4 g, 40 ft., ~200 seeds **LG** \$27.00=1 oz., 280 ft., ~1400 seeds

BIODYNAMIC FOOD PRODUCTS

AL1 ALMONDS AND RAISINS Ecologically Grown Great tasting Demetercertified Biodynamic almonds. Marion farms is a Biodynamic farm and distillery in Fresno, California. On their website they say: We believe in three things: growing great food, crafting fine spirits (which can be used to make homeopathic medicines), and taking care of the earth. Really, we dont think that the first two are possible without the latter." Meadowlark Hearth orders Marian Farm almonds as well as raisins for MH farm crew! The almonds are delicious! Also the raisins which are Thompson variety. We invite you to check it out their website: www.marianfarmsbiodynamic.com

NEW! WHW WHEAT, SNOW WHITE, HWWW (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. A hard white winter wheat from Kansas. Moderately drought tolerant. Straw height is typically two-to-three feet. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. White wheat is slightly sweeter than red wheat. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them:785-678-7006,

S \$9.00=1 lb **M** \$22.00=10 lb **LG** \$35.00=20 lb

NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. HEIRLOOM. Hard red winter wheat. Turkey Red is the parent to many varieties of hard red winter wheat in the United States. This Turkey Red wheat seed has been grown in Kansas since the 1870s. Straw height can reach upwards of four feet in areas with 20-inches plus moisture. It is adaptable to wet, dry, hot and cold areas. It does require a hard freeze in the winter to develop grain to harvest the following summer. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006, From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006, ≈900 seeds/oz.

S \$10.00=1 lb **M** \$25.00=10 lb **LG** \$40.00=20 lb

BOOKS & CALENDARS

NEW! BK23 2023 STELLA NATURA CALENDAR Ecologically Grown One of our most important tools for our farm is this calendar. From Sherry Wildfeuer who has carried this work for many decades: "I would especially encourage you to read the article in the front pages by Manfred Klett about "The Unknown World of the Etheric." This contribution to the Calendar from twenty years ago is just as relevant now, as it explores the realm of life that is so often overlooked when the universe and nature are viewed as a mere mechanism. Also in those front pages, please look for my note about the future of Stella Natura, and an attempt to help in navigating the increasing number of biodynamic planting calendars on the market. It would be easy to miss page 12, which gives a monthly account of the visibility of the planets in 2023, and the star chart on pages 38 and 39, but I consider them essential to the Calendar. Only when we take the time to look up and follow the movements of the Moon and planets among the stars at night will the beauty and wonder of our heavenly surroundings come alive in us. In these challenging times, I hope this calendar will support you in bringing vitality to the food you grow and health to your inner life." **\$15.00**

BK2 DEVELOPING THE SELF Ecologically Grown What is this book doing on a seed offering website? Answer from Meadowlark Hearth Biodynamic Seed Initiative: If we are to strive toward healing the earth, we must seek out ways to work with ourselves as farmers toward healing. "Individual effort toward development of the higher self is essential for genuine progress on the inner work path. The clear insights and exercises outlined in this book reveal the meaning and necessity of this essential striving in the present consciousness soul age, contributing toward enlivening both our inner and outer work at the same time. The path of developing the self and our work in the world are not separated, but united through the practices and their results." 145 pages, weight: 170 grams or .40 lb **\$17.00**

BK5 HIDDEN IN THE THIRTEENTH MOON Ecologically Grown This is a collection of stories from one of the growers of some of our best seed varieties: Lutz, ice cream melon, breeding of Harmony sweet corn, delicata, kindred orange squash. Here is what author Marcia Halligan says about the book of farm stories, she and her partner Steven Adams have nurtured for over a couple of decades: "Farmers and gardeners learn by observing plants, animals and weather conditions. From the author: My years of recording stories in my journals of cats, goats, and horses, as well as our wild creature neighbors led to my book, Hidden in the 13th Moon. Our wild neighbors include insects, birds, animals and reptiles. Practicing awareness strengthens our abilities and enriches our daily lives." This book is helping support her retirement. . **\$12.00**

NEW! BKG IMAGINING THE GOETHEANUM (subtitle) Ecologically Grown "An Architectural Exploration in the Language of Polar Logic" is the subtitle to this amazing book of study by Jonathan Alesander. The Goetheanum, located in Dornach, in the county of Solothurn, Switzerland, is the world center for the anthroposophical movement. The building was designed by Rudolf Steiner and named after Johann Wolfgang von Goethe. Quote from the designer of the Goetheanum: Our building had to be a twofold structure. Its forms express the polar nature of the human being and the architecture of the Goetheanum as well as the principle of polarity is spoken of in one breath. Author Jonathan Alesander explores the Goetheanum's structure in meaningful depth of the polarities to be seen in this unique building design and structure and its surroundings. **\$18.00**

BK7 RETHINKING ECONOMICS Ecologically Grown 14 lectures given by Rudolf Steiner in Dornach, Switzerland July 14-August 6, 1922 (CW 340) 6 seminars in Dornach, July 31-August 5, 1922 (CW 341) In this age of social, economic, and ecological disruption, many people are beginning to realize that perhaps the most important root causes for this crisis originate in an economic thinking that is increasingly out of touch with the social, ecological, and spiritual realities of our time. **\$40.00**

BK6 STEINERIAN ECONOMICS Ecologically Grown We offer this thoughtful compendium because the quandary presented to farmers of true food for human beings, (non commodities) ensnared in US financial games would do well to consider these possibilities presented here. Edited by Gary Lamb and Sarah Hearn: Rudolf Steiner developed a comprehensive view of social life, which he saw as being made up of three interdependent areas of

societyspiritualcultural, political, and economic. His social philosophy grew out of this view to become associative economics. In contrast to our current global financial systems, Steiners approach is collaborative and serves the real needs of consumers. **\$30.00**

BK8 THE SEVENTH SHRINE Ecologically Grown BY ORLAND BISHOP: Knowing that gardens are one of the most cosmopolitan activities, we wanted to share this remarkable writing. From the author: " When I navigate the currents of the soul, I find myself within my ancestral pool. I find myself swimming in their grief, and the longing during the great event and initiation called the Middle Passage. I find myself in their collective soul journey from a place of homeland to a dream of the Promised Land. This book is a telling of the soul striving of people of African heritage into the American experience of creating community." **\$20.00**

BK3 THE SPIRIT IN THE REALM OF PLANTS Ecologically Grown This is a very thought provoking lecture given in Dec of 1910. It is part of a trilogy of examination of how the spirit manifests in the various aspects of creation. We are suggesting that you take a look. We will NOT be shipping this to you. You can go online and get this lecture from Rudolf Steiner free. The Spirit in the Realm of Plants: <http://wn.rsarchive.org/Lectures/19101208p01.html> **\$0.00**

BROCCOLI (*Brassica oleracea*) ~6,000 seeds/oz.

BR2 CALINARO Cert. BD/OG 55-60 days. Photo above Still trialing this it has performed differently in varied years. The original source is from Bingenheim Biodynamic seed company in Germany. Three to four inch heads. Side shoots, sometimes as large as the primary head. We are now offering what we grew out in 2018. Try it and let us know how it does for you! Some variation in it that makes it more of a home gardener broccoli. Grown by NB. $\approx 4,400$ seeds/oz.

S \$4.00= ≈ 50 seeds **M** \$10.00= 1 g, ≈ 200 seeds

BR5 PIRACICABA Cert. BD/OG Between a heading broccoli and broccoli raab. Small loose tender heads good for eating raw or cooked. Lots of side shoots. Leaves are also tasty. Best as a fall crop.

S \$4.00= 0.5 g, ≈ 100 seeds **M** \$9.00= 2 g, ≈ 400 seeds **LG** \$28.00= 8 g, ≈ 1600 seeds

BR8 RASMUS Cert. OG 60-65 days. Strong medium-growing broccoli with gray-green leaves. Solid, fine-grained, big flowering stems. Strong, non-woody stalk. After main harvest side shoots can be harvested as broccoli sprouts. Mild, fine aromatic taste. $\approx 4,000$ seeds/oz.

S \$4.00= ≈ 20 seeds **M** \$9.00= 0.5 g, ≈ 60 seeds

BR3 UMPQUA Cert. BD 65-80 days. Open-pollinated! Vigorous plants. Head size varies a lot. Good side shoot production. Recommended for home gardeners, small - medium CSA gardens or farmers markets where the gardener is looking for a replacement for all the hybrid broccoli. If you have plenty of space as a farm, the attribute about Umpqua is the long window of harvesting. This variety was bred by Peters Seed back in the 90's. Hope to have more of this next year. $\approx 6,000$ seeds/oz.

S \$3.00= 0.5 g, ≈ 100 seeds **M** \$8.00= 2 g, ≈ 400 seeds **LG** \$12.00= 10 g, ≈ 1000 seeds

CABBAGE (*Brassica oleracea*) ~7,000 seeds/oz.

CB1 AMARANT Cert. BD/OG 75 days. Early cabbage with a wonderful reddish purple hue. Forms solid heads that store well, so good for either early, mid-season, or late crops. Can store for a couple of months into the winter. $\approx 5,330$ seeds/oz.

S \$4.00= 0.125 g, ≈ 30 seeds **M** \$7.00= 1 g, ≈ 175 seeds

NEW! CB4 DONATOR Cert. BD/OG 90 days. Tightly wrapped leaves, good production and flavor from Germany. One of the very best cabbages for sauerkraut. The abundantly large heads also make great cole slaw. 120 days, In Nebraska we transplant it in mid May to early June, harvest in September Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by BH. $\approx 6,000$ seeds/oz.

S \$3.00= 0.5 g, ≈ 100 seeds **M** \$7.00= 2 g, ≈ 400 seeds **LG** \$20.00= 0.25 oz., ≈ 1500 seeds

CB2 DOTTFELDER STORAGE Cert. BD/OG 90 days. Check back next year for larger amounts since we are growing this variety in 2019. Exceedingly tight, firm green fast growing heads with a good sweet flavor. Stores well into APRIL from late spring transplanting the previous year!!! Medium large, slightly oval, firm, green heads. Late

cabbage with excellent keeping quality. Outer leaves relatively small, slow growing. Inner core quite short. Harvest in autumn taking care to cut and store soon enough to guard against splitting with autumn moisture. Helpful for market gardeners and CSA's to have this kind of storage cabbage into the next spring when there are few other vegetables to harvest from the garden. There is variability in the shapes of the heads with some being more flat, some oval and some round showing how diverse yet strong the variety is. Cultivation instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by BH and NB. $\approx 7,000$ seeds/oz.

S \$3.00=0.25 g, ≈ 40 seeds **M** \$11.00=1 g, ≈ 160 seeds **LG** \$60.00=10 g, ≈ 1600 seeds

CB3 **EARLY BIRD CABBAGE** **Cert. BD/OG 60 days.** Its delicious mild flavor, crisp tender texture, and very early maturity makes this cabbage a winner for CSA's and farmer's markets. Even people who usually do not care for cabbage enjoy its light flavor and crispness. Quick maturity (60 days) allows multiple plantings from early spring through August. Cultivation Instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out to 1" spacing between plants. Harden off and transplant outdoors 18" apart. Early Bird can be planted before the last frost. It can also mature in the autumn after the frost so it is a good cabbage to do in successions since it matures in 60 days. Grown by NB. $\approx 5,330$ seeds/oz.

S \$4.00=0.5 g, ≈ 150 seeds **M** \$8.00=2 g, ≈ 300 seeds

CB8 **EUROPEAN STORAGE** **Ecologically Grown 100 days.** Good long term storage variety with medium size solid green heads, grown by Biodynamic gardener Heike Marie Eubanks. Large tall plants, good for wet climates as well as dry, long term storage cabbage. Heike Marie has farmed her acreage with BD methods for over 40 years. $\approx 5,330$ seeds/oz.

S \$3.00=1 g, ≈ 160 seeds **M** \$700.00=4 g, ≈ 400 seeds **LG** \$12.00=0.25 oz., ≈ 1200 seeds

NEW! CB6 **FILDERKRAUT** **Cert. OG** VERY LARGE but the leaves are really tender, excellent for sour kraut with good flavor and also great for early sweet cabbage. Warning: It can grow to 20 pounds if not harvested early. Grown by BH and SAT. $\approx 7,000$ seeds/oz.

S \$4.00 ≈ 25 seeds **M** \$6.00=0.5 g, ≈ 80 seeds **LG** \$12.00=2 g, ≈ 320 seeds

CH1 **GRANAT** **Cert. BD/OG 60 days.** Makes 12 in. high, slender yet solid compact heads. Its crisp mild leaves are delicious in stir fries or delicious winter salad. Grown by BH. $\approx 9,000$ seeds/oz.

S \$4.00=0.1 g, ≈ 25 seeds **M** \$8.00=0.5 g, ≈ 100 seeds **LG** \$24.00=2 g, ≈ 400 seeds

CB9 **HOLSTEINER PLATTER** **Cert. BD/OG 90 days.** Vigorous, large headed variety with strong surround leaves. Flattish round head; good for sauerkraut, not suited for storage. Very good flavour. $\approx 7,000$ seeds/oz.

S \$3.00 ≈ 25 seeds, ≈ 60 seeds **M** \$7.00=0.5 g, ≈ 100 seeds **LG** \$20.00=2 g, ≈ 400 seeds

NEW! CB7 **RODYNDA** **Cert. BD/OG 95-110 days.** Bred by Dieter Bauer at Dottenfelderhof in Germany. Deep-burgundy red storage cabbage with medium-large heads, both beautiful and delicious. Excellent storage type! Grown by NB. $\approx 6,000$ seeds/oz.

S \$4.00=0.5 g, ≈ 100 seeds **M** \$7.00=2 g, ≈ 400 seeds **LG** \$25.00=7 g, ≈ 1800 seeds **XL** \$60.00=1 oz., ≈ 700 seeds **4+ oz.** \$50.00/ oz. bulk rate

CHINESE CABBAGE (*Brassica rapa*) $\approx 9,375$ seeds/oz.

CH1 **GRANAT** **Cert. BD/OG 60 days.** For autumn harvest. Sow June-July to beginning of August. 4-6 weeks before the first frost. Makes 11-15 inch high, slender yet solid compact heads. Mild but, refreshing flavour with crisp consistency making it nice for steaming or great for stir fries and excellent for winter salads. Cover with cloth or paper, store at 40 degrees or lower and you will have delicious salad through the winter. A real boon at Farmer's Markets when people are looking for salad ingredients. Best sown in June indoors, 3-4 per inch, inch deep, 4-6 weeks before setting out in garden. At true leaf stage transplant into pots, cells or flats with 1 inch spacing between plants. Harden off and transplant outdoors 12-16 inches apart. Grown by BH. $\approx 9,000$ seeds/oz.

S \$4.00=0.1 g, ≈ 25 seeds **M** \$8.00=0.5 g, ≈ 100 seeds **LG** \$24.00=2 g, ≈ 400 seeds

CARROTS (*Daucus carota*) $\approx 18,000$ seeds/oz.

CAP2 COSMIC PURPLE Cert. BD/OG Great purple carrots for spring planting with purple skin and yellow to orange flesh with an edgy flavor. *≈18,000 seeds/oz.*

S \$4.00=0.5 g, *≈300 seeds* **M** \$8.00=2 g, *≈1200 seeds* **LG** \$16.00=8 g, *≈4800 seeds*

SALE! CT9 DOLCIVA Cert. OG 130 days. Quick growing, sweet early carrot with strong tops, resistant to alternaria disease. This open-pollinated variety of carrot holds its own in taste trial comparisons with hybrid varieties. Lives up to the meaning of dolce as sweet. *≈18,000 seeds/oz.*

S \$4.00=0.5 g, *≈250 seeds* **M** \$7.00=4 g, *≈2000 seeds* **XL** \$23.00=1 oz., *≈18000 seeds* **4+ oz.** \$15.00/ oz.
bulk rate **1 lb** \$220.00

CT7 MILAN NANTES Cert. BD/OG 72 days. An early, uniform, blunt-ended early carrot that can be forced under row cover for spring bunching carrots. Can even be stored but its highlight is for early bunching. Very good sweet flavor. Our farmer market customers love the flavor! Cultivation instructions: Sow outdoors from early spring to mid-summer. Grow in full sun in rich, loose, deeply worked soil. Sow 1/2 inch deep and -1 inch apart in rows 12 inches apart. Keep moist until seedlings emerge. Thin to 2 inches between plants. Grown by BH and NB. *≈18,000 seeds/oz.*

S \$4.00=0.5 g, sows 20 ft., *≈300 seeds* **M** \$8.00=3 g, 100 ft., *≈1800 seeds* **LG** \$18.00=15 g, 400 ft., *≈9000 seeds* **XL** \$28.00=1 oz., 600 ft., *≈18000 seeds*

NEW! CT8 PURPLE DRAGON Cert. BD/OG This carrot is best planted later in the season. Otherwise it tends to bolt when planted early in the spring. Sweet yet pungent, a different taste in carrots, the purple gives a new look to carrots. Truly purple skin with orange flesh inside. Improved from a USDA strain by Dr. John Navazio, with lycopene content equal to tomatoes! Novelty appeal for farmer's market customers. *≈18,000 seeds/oz.*

S \$4.00=1 g, *≈600 seeds* **M** \$11.00=4 g, *≈2400 seeds* **LG** \$29.00=1 oz., *≈18000 seeds* **1 lb** \$375.00

NEW! CT4 RODELIKA Cert. OG 72 days. Improved Rothild bred by biodynamic farmer/breeder Dieter Bauer in Germany. Does well in heavy soil. A good storage variety with a very good flavor. Grown by SAT. *≈18,000 seeds/oz.*

S \$4.00=1 g, sows 20 ft., *≈600 seeds* **M** \$8.00=4 g, 80 ft., *≈2400 seeds* **LG** \$12.00=10 g, 200 ft., *≈5500 seeds*

CT5 ROLANKA Cert. BD/OG 75 days. Aromatic rodelika type from Biodynamic breeding in Europe with excellent storage capacity, smooth skin and deep orange color, The photo is of carrots in April morning sun which had been stored through the winter. Even though they were from storage and were large, they still excellent quality texture and flavor. We use it for our year round CSA shares. Grown by NB. *≈18,000 seeds/oz.*

S \$4.00=0.5 g, sows 10 ft., *≈300 seeds* **M** \$8.00=2 g, 30 ft., *≈1000 seeds* **LG** \$12.00=8 g, *≈4000 seeds*

CT6 SCARLET NANTES IMPROVED (*seed movement scarlet nantes*) Cert. BD/OG 75 days. Uniform, medium-long, blunt-tipped roots. Sweet and juicy and keeps its quality through a long season. We get many repeat customers for these carrots at the farmer's market and its excellent storage makes it possible for us to include it in our year round CSA. Original source was a John Navazio selection. Grown by NB. *≈18,000 seeds/oz.*

S \$4.00=0.5 g, sows 10 ft., *≈300 seeds* **M** \$7.00=2 g, 40 ft., *≈1200 seeds*

CAULIFLOWER (*Brassica oleracea*) *≈7,000 seeds/oz.*

CF5 AMABILE Cert. OG Very early cauliflower with tightly crinkled, dark, grey-green leaves and low growing habit. Matures relatively uniformly and therefore has a short harvesting window. Forms healthy and heavy, very solid white heads. High percentage of grade 8 selections. Good resistance against graininess. Fine, delicate taste *≈7,000 seeds/oz.*

S \$5.00≈20 seeds **M** \$14.00=0.5 g, *≈110 seeds*

CF2 ODYSSEUS Cert. OG 70 days. For early planting in the spring or possibly depending on your region's weather autumn planting. Give plenty of water and protection. Does need to fold the leaves over the head when it begins to develop. Does not naturally cover. Small to medium-sized heads with white curds when blanched: tie leaves over forming heads to protect from the sun. Sturdy, compact plants, not self blanching therefore KEEP an eye on them when they are ripening and help them cover their heads by breaking their outside leaves over the cauliflower head. For best results, start in greenhouse then transplant outside. Cultivation instructions: Sow indoors 4 weeks before set out in May or early June. Prick out at true leaf stage to 1" apart .TP outdoors 18" apart. *≈7,000 seeds/oz.*

S \$4.00≈20 seeds **M** \$9.00=0.25 g, *≈60 seeds* **LG** \$19.00=1 g, *≈240 seeds* **XL** \$55.00=2.5 g, *≈600 seeds*

CELERY & CELERIAC

(*Apium graveolens*) ~75,000 seeds/oz.

CE2 VENTURA CELERY **Cert. BD/OG 52-100 days.** 28-30 in. tall glossy bright green plants with 12 in. stalks and well-developed heart. This variety has stood the test of time. Sow indoors about 12 weeks before transplanting, 6 seeds/in, 1/8" deep. Keep moist at 70-75 F. At true leaf stage, thin or prick out to 1-2" spacing. Set outside after danger of frost, 12" apart in rows 18" apart. Grown by RG. ≈75,000 seeds/oz.

S \$4.00=0.15 g, ≈200 seeds **M** \$8.00=0.5 g, ≈800 seeds **LG** \$22.00=2 g, ≈4000 seeds **XL** \$60.00=0.25 oz., ≈15000 seeds **1 oz.** \$140.00≈75000 seeds

CE1 MONARCH CELERIAC **Cert. BD/OG 100-150 days.** Productive scab resistant improved Giant Prague type matures fall to early winter. Large roots with firm white flesh. Celery root is a wonderful vegetable for the colder climates to have throughout the winter to add to soups, used like celery in stuffing, even grated for a Waldorf salad. It also makes a great cream of celery tasting soup without the fibers that would happen with stalk celery. Grown by NB. ≈50,000 seeds/oz.

S \$4.00=0.15 g, ≈200 seeds **M** \$6.00=0.5 g, ≈850 seeds **LG** \$11.50=2 g, ≈3000 seeds **XL** \$71.00=0.5 oz., ≈24000 seeds **1 oz.** \$136.00≈48000 seeds

CONSULTATION

SWEET CORN (Zea mays) 100-150 seeds/oz.

NEW! CS2 DAMAUN **Cert. BD/OG 85-95 days.** Biodynamically bred open pollinated sugary enhanced early yellow sweet corn bred at the Swiss Biodynamic seed company in Switzerland! Delicious, very sweet and dependable open pollinated sweet corn which can hold its sweetness which is uncommon for open pollinated varieties of sweet corn. Grown by NB.

S \$5.00=1 oz., ≈80 seeds **4+ oz.** \$4.50/ oz. bulk rate **5+ lb** \$50.00/ lb bulk rate≈12500 seeds

CS1 HARMONY Cert. BD/OG 90 days. A great, new cross from Wisconsin Biodynamic seed grower Steven Adams. Stalks between 7 and 8 feet depending on climate in which it is grown, often with multiple ears on a stalk, sweet good corn flavor with two toned colors of yellow and white. This variety did well in both wet and dry conditions. Still in early stages of development, we offer this for those interested in trying a new open pollinated variety. We would like to know how it does in your area. In warm, fertile soil, sow seeds 1 inch deep and 4 inches apart, in blocks of at least three rows spaced about 20 inches apart. Thin 8-12 inches apart. Grown by NB and SA.

S \$3.00=1 oz., sows 40 ft., ≈120 seeds **M** \$10.00=4 oz., 160 ft. **LG** \$30.00=1 lb

NEW! CS5 ROSE POTPOURI (rose potpourri sweet corn) Cert. BD/OG 85 days. Lovely open pollinated red sweet corn: What a surprise: 16 rows of kernels on full bodied 6-8 in. ears that range from rosy pink to deep burgundy as they mature. There is a small percentage of white, yellow and bicolor ears. Cook it as soon as you pick it or it also makes beautiful display ears as dried corn. Sow outdoors in spring after all danger of frost is past and soil has warmed. Plant 1" deep, 3-4 seeds/ft. in rows 30" apart. Thin to 8"-12" apart in row. Plant in blocks of at least 4 rows to insure good pollination.

S \$3.00=1 oz. **M** \$10.00=4 oz. **LG** \$22.00=1 lb

POP CORN (*Zea mays*) 250 seeds/oz.

NEW! CN2 CHEROKEE RAINBOW Cert. BD/OG HEIRLOOM from .Merlyn Niedens, combining several strains of long ear Cherokee popcorn sent to Southern Exposure Seed Exchange by Carl Barnes of Turpin, OK. Carl has helped save many of the Cherokee corns that came west over the Trail of Tears. This small kernelled variety makes surprisingly large pops, yielding for a low hull/ corn ratio. Great flavor. Highly ornamental, 5-7 in. ears have many shiny colors including red, blue, orange, white, and yellow with surprising variations. 6-8 ft. plants. We thank the First People's for the possibility to have corn.

S \$3.00=1 oz. **M** \$10.00=4 oz. **LG** \$15.00=1 lb **5+ lb** \$13.00/ lb bulk rate

CUCUMBERS (*Cucumis sativus*) ~1060 seeds/oz.

CU4 BONO Cert. BD/OG Selection of cucumber from Switzerland. Large, dark green, smooth-skinned fruits that do not need trellising. Grown by NB. ≈1,000 seeds/oz.

S \$3.00=1 g, sows 25 ft., ≈30 seeds **M** \$7.00=4 g, 100 ft., ≈120 seeds **LG** \$10.00=0.5 oz., 400 ft., ≈420 seeds

S

CU3 BOSTON PICKLER Cert. OG 55 days. Heirloom from the 1800's still worthy today with long vines and good yields of stubby green fruit and very hardy even in wet years. Excellent texture and flavor in pickles. Field was sprayed with the Biodynamic preparations. Grown by JT. ≈1,063 seeds/oz.

S \$3.00=1 g, ≈40 seeds **M** \$6.00=0.25 oz., ≈200 seeds **LG** \$9.00=1 oz., ≈1000 seeds **XL** \$16.00=2 oz.

SALE! CU1 GREEN FINGER Cert. BD/OG Bred by Cornell University, this cucumber goes a long ways toward smooth skin cucumbers in the field. Mild flavor. Skin is somewhat tough so good to ship. Very slender fruit. Disease Resistance: Powdery Mildew, Papaya Ring Spot Virus, Watermelon Mosaic Virus, Zucchini Yellow Mosaic Virus. Make sure to keep up with the harvest. Grown by NB. ≈1,063 seeds/oz.

S \$3.00=1 g, ≈35 seeds **M** \$7.00=0.25 oz., ≈250 seeds **LG** \$15.00=1 oz., ≈1000 seeds **4+ oz.** \$9.00/ oz. b

NEW! FC4 TREFOIL, BIRDSFOOT Cert. OG A legume with yellow flowers for fixing nitrogen which is low growing, great in pasture mixes with grass mixes especially bred for calcium soils It is equal to alfalfa intolerance to saline-alkaline soils and is adapted to soils of medium acidity. The best pH range for establishment is 6.0 to 6.5 though it tolerates a broader pH range of 5.5 to 7.5. Endures cold and drought. Go light on putting it in your mix until you find out how it performs in your climate and your soil. It is not welcome in these following states or at least needs attention for not getting out of hand: CA, IL, MN, MO, OR, TN, VA, WA, and WI. These prior mentioned states have somewhat wet climates and therefore it works well in drier climates for that reason. ≈23,000 seeds/oz.

FLD1 TITHONIA, MEXICAN SUNFLOWER (*Tithonia rotundifolia*) Cert. BD/OG 85-90 days. Stunningly showy beautiful large 4 ft annual with 3 in. bright orange daisy-like flowers from mid-summer until frost. Needs warmth to germinate. Nice cut flower. Sensitive to cold. Sow in greenhouse 6-8 weeks before transplanting outside. Large plants, give a 4 foot to 6 foot space. $\approx 2,800$ seeds/oz.

S \$3.00 ≈ 10 seeds **M** \$7.00=0.5 g, ≈ 45 seeds

NEW! HTO TOBACCO, NICOTIANA TOBACUM (*NICOTIANA, TOBACUM*) Cert. BD/OG need to be started inside just like tomatoes. Impressive for a flowering border because it grows to over 6 feet tall.

S \$3.00 ≈ 100 seeds **M** \$12.00=0.1 g, ≈ 700 seeds **LG** \$25.00=1 g, ≈ 7000 seeds

NEW! FL3 ZINNIA, SCARLET Cert. BD/OG Medium large scarlet red flowers with yellow and brown middles. Really a stand out in bouquets at the market. Grown by NB.

S \$3.00=0.5 g, ≈ 40 seeds **M** \$10.00=2 g, ≈ 160 seeds

GARLIC

NEW! GA7 RED CHESNOK, PURPLE STRIPE TYPE HARDNECK Cert. BD/OG ORDER NOW: SHIPS SEPT through DEC 2022. This year: average clovest in a bulb is 12. Grows through the winter and harvested around the following July depending on where you are located. We will open our 2022 sales after our harvest in July. CHESNOK: 8-10 easy to peel cloves per purple striped bulb. Originates from the village of Shvelisi, Republic of Georgia. Good for baking. Hardneck type. MH tests regularly for garlic nematodes.

S \$15.00 ≈ 3 bulbs, sows 12 ft. **M** \$20.00=1 lb, 30 ft. **LG** \$93.75=5 lb, 150 ft.

GF1 SPECIFICALLY FOR EATING Cert. BD/OG Great for eating, a mix of all our varieties grown on our certified Biodynamic and certified organic farm, for eating, NOT recommended for seed since they are the remainders left out of our seed selection. We mix the varieties. MH tests regularly for garlic nematodes.

M \$8.00=1 lb

GA2 SELECT SEED: MUSIC ARIA Cert. BD/OG ORDER NOW: SHIPS SEPT through DEC 2022. GARLIC IS PLANTED from OCT through November. Grows through the winter and harvested around the following July depending on where you are located. SHIPS SEPT through DEC 2021. All MH garlic has been tested, determined clean from root and leaf nematode. MUSIC IS HARDNECK PORCELAIN garlic, Beautiful, easy to peel and a vigorous grower with usually 4-5 large cloves with good flavor. THIS YEAR: 9 bulbs per pound. With every bulb you get about 4 cloves. Very easy to grow and a hardy type for severe winters. **HEIRLOOM** .Our Music Aria garlic strain started with Al Music who brought it back from his homeland in Italy to Canada, and was further selected by Danielle LaBerge in Quebec, then passed on to Jean-David Derramaux who began the Healing Plant Gardens at Camphill Village USA in upstate New York in the 1990's. Now it has transferred itself to Nebraska and has done very well here. This garlic grows bigger than any garlic we have ever grown, yet maintains its great flavor.! It is truly outstanding in every way. For best results of nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We plant ours in mid-October in Nebraska. We are zone 4. Harvest in July. MH tests regularly for garlic nematodes. Grown by NB.

S \$15.00≈3 bulbs **M** \$20.00=1 lb **LG** \$90.00=5 lb **XL** \$325.00=25 lb

NEW! GA4 SELECT SEED: INCHELLIUM, DIXON HARDY SOFT NECK Cert. BD/OG ORDER NOW: SHIPS SEPT through DEC 2022. GARLIC IS PLANTED from OCT through November. 2022 average Plantable clovest in a bulb 12 -16 cloves. Softneck garlics are the types of garlic for braiding. It grows through the winter and then is harvested around the following July depending on where you are located. DIXON HARDY SOFT NECK **HEIRLOOM from** .Montana, extraordinary storage capability! Artichoke type selected over several decades by the Batey's organic farm in Montana so it has become a very hardy SOFTNECK! Its origin can be traced to red inchellium with one other artichoke variety in the mix. Red Inchellium was found on the Coleville Reservation in eastern Washington. Cloves are larger than most softnecks, easier to peel than our other soft neck varieties. For best results of nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We plant ours in mid-October in Nebraska. We are zone 4. Harvest in July. 2020 DIXON FIRSTS are AROUND 1 DOZEN BULBS PER POUND AND AROUND EIGHT CLOVES PER BULB. That is quite different from last year when we grew them for the first time here in Nebraska. MH tests regularly for garlic nematodes.

S \$15.00≈3 bulbs, sows 3 ft. **M** \$20.00=1 lb **LG** \$90.00=5 lb **XL** \$192.00=12 lb

GA3 CALIFORNIA EARLY-NEBRASKA SELECT Cert. BD/OG ORDER NOW: SHIPS SEPT through DEC 2022. GARLIC IS PLANTED from OCT through November. Grows through the winter and harvested around the following July depending on where you are located. **California EARLY NEBRASKA SELECT IS SOFT NECK TYPE.** Softneck garlics are the types of garlic for braiding. Harder to peel than hardneck types but stores better than hardnecks. Our strain stores until late spring of the following year after July harvest when stored in cool, dry conditions. They are an artichoke formation of cloves and have around 10-12 cloves so there are more plants possible per bulb than the hardneck varieties. Soft necks are best for milder winters but our strain has been selected to survive our cold, dry winters in western Nebraska. Another advantage to softneck garlics besides their long storage is that they can be braided. In general, mild climates are better off growing softnecks. But people where the winter's are colder like to have an acclimated softneck so that they can have garlic after the hardnecks are done storing in February. For best results of nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We plant ours in mid-October in Nebraska. We are zone 4. Harvest in July. MH tests regularly for garlic nematodes. Grown by NB.

S \$15.00≈3 bulbs, sows 15 ft.

NEW! GA1 SELECT SEED: CHRYSALIS ROSE GARLIC Cert. BD/OG IT'S BACK! **HEIRLOOM from Chrysalis Farm originally.** SHIPS SEPT through DEC 2022. HARDNECK TYPE, has 7-9 large cloves per bulb and about 7 bulbs per pound. It is delicious with a robust garlic taste, and is easy to peel. After July harvest it stores for about five months best in cool dry conditions at around 40 degrees. . It is a favorite at our farmer's market. **HEIRLOOM from** .We obtained the seed from Steven Adams of Chrysalis Farm and EZ Farming, a 25 year old Wisconsin Biodynamic farm, and we have been maintaining it for many years. Survives in severe winters. For best results of nicely formed garlic bulbs, plant in autumn. We sow in October about 6-8 inches apart in the row. We plant ours in mid-October in Nebraska. We are zone 4. Harvest in July. MH tests regularly for garlic nematodes. Grown by NB.

S \$18.00≈3 bulbs, sows 12 ft. **M** \$20.00=1 lbs **LG** \$90.00=5 lb

GREENS, ASIAN *(Brassica rapa)*

NEW! GRRT BRISEBOIS'S RAINBOW TATSOI Cert. BD/OG From Dan Brisebois of Tourne De Sol a tatsoi which has green leaves and various hues of purple and pink on the stems. Quite hardy, beautiful and delicious. Check out his story of breeding it. <https://goingtoseed.wordpress.com/2019/02/07/how-i-bred-rainbow-tatsoi/> ≈12,000 seeds/oz.

S \$3.00=0.5 g, ≈200 seeds **M** \$8.00=2 g, ≈800 seeds

CH1 GRANAT Cert. BD/OG 60 days. Makes 12 in. high, slender yet solid compact heads. Its crisp mild leaves are delicious in stir fries or delicious winter salad. Grown by BH. ≈9,000 seeds/oz.

S \$4.00=0.1 g, ≈25 seeds **M** \$8.00=0.5 g, ≈100 seeds **LG** \$24.00=2 g, ≈400 seeds

GR1 KOMATSUNA (Spinach Mustard) Cert. BD/OG 45 days. Tender mild glossy dark-green leaves up to 12 in. long. Sown like spinach, but germinates more quickly, especially in a cold season. Does not have oxalic acid as is found in regular spinach, making it preferred by some people to regular spinach. Grown by NB. ≈12,500 seeds/oz.

S \$3.00=0.5 g, ≈200 seeds **M** \$7.00=2 g, ≈800 seeds **LG** \$15.00=15 g, ≈6000 seeds

GR6 KYONA MIZUNA (*Brassica rapa*) Cert. BD/OG 50 days. Mild, pretty Asian mustard with deeply cut leaves. Large rosettes with 12 in. leaves if 8 in. between plants. ≈12,500 seeds/oz.

S \$3.00=0.25 g, ≈100 seeds **M** \$10.00=1 g, ≈400 seeds

NEW! GR3 MOUTARDE ROUGE METIS (ruby streaks) Cert. BD/OG These dark red lacey beauties also have a great flavor, pungent but not aggressive! A delightful addition to any salad. ≈12,000 seeds/oz.

S \$3.00=0.5 g, ≈200 seeds **M** \$8.00=2 g, ≈800 seeds

NEW! GR7 MUSTARD, OSAKA (*Brassica juncea*) Cert. BD/OG 80 days. Large round purple-veined leaves with mild mustard flavor. Good in salad or mixed into a stir fry. Winters over in mild areas. ≈12,500 seeds/oz.

S \$3.00=0.5 g, ≈200 seeds **M** \$6.00=2 g, ≈800 seeds **LG** \$10.00=0.5 oz., ≈6200 seeds **XL** \$20.00=2 oz., ≈25000 seeds

S \$4.00=0.5 g, ≈150 seeds **M** \$10.00=2 g, ≈600 seeds

GR5 PAC CHOI, PRIZE (*Brassica rapa*) Cert. BD/OG 50 days. Heavy upright vase-shaped rosettes of tender dark-green spoon-shaped leaves on thick solid-white stems. Grown by NB. ≈12,500 seeds/oz.

S \$3.00=1 g, ≈440 seeds **M** \$8.00=4 g, ≈1500 seeds **LG** \$15.00=0.5 oz., ≈6000 seeds **XL** \$27.00=2 oz., ≈5000 seeds

GR9 WASABINO (*Brassica rapa var. japonica*) Cert. BD/OG This delicate mustard type can spice up a salad well. Fine notched, light green leaves. The spicy, slightly spicy taste is reminiscent of horseradish and gives salads a fresh note. Cold resistant. Harvest baby leaf after 3 weeks. ≈10,000 seeds/oz.

S \$3.00=0.25 g, ≈70 seeds **M** \$8.00=1 g, ≈250 seeds

GREENS, SPECIALTY

GR8 AMARA KARATE GREENS (*brassica carinata*) Cert. BD/OG 50-65 days. Greens A buttery textured green grown in the cool of autumn or spring, kale like mustard with smooth texture when cooked, steamed, stir fried and great addition to salads or by itself raw or try it in smoothies. Somewhat like narrow leaf collards but a different species. And it is best planted in early spring or for late summer for autumn harvest depending on how long your autumns are. Rich in vitamin C and folic acid. Grown out by Harald Hoven in California. Also Known as Ethiopian Kale or Abyssinian mustard. For seed buffs from Wikipedia: *brassica carinata* is thought to result from an ancestral hybridisation event between *Brassica nigra* (genome composition BB) and *Brassica oleracea* (genome composition CC). Considered to be in development for an oil seed crop. ≈5,000 seeds/oz.

NEW! LTO4 STRUBEL PETER Cert. **BD/OG** HEIRLOOM from Switzerland . Strubel Peter refers to a story first published in 1845 about boy with curly and unruly hair 'adventuring' through his life.. Nevertheless, we find this good tasting green oak leaf though curly leafed, decidedly neat and trim looking as well as delicious!.

S \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds

OL2 YEAR ROUND BRONZE OAK Cert. **BD/OG** 40-45 days. This delicious oak leaf variety was developed by Harald Hoven out of Lingue de Canarino. It forms large, sweet, fast-growing heads that are late to bolt. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart. Grown by RG.

S \$3.00≈50 seeds **M** \$6.00=0.25 g, ≈200 seeds

MELONS / CANTALOUPE (Cucumis melo) ~1100 seeds/oz.

ME1 DELICIOUS 51 PMR Cert. **BD/OG** 82 days. A northern variety with powdery mildew resistance bred in by Dr Munger and the team at Cornell Univ. Early 4-5 lb. round-oval fruit, well netted with sweet salmon-orange flesh. Excellent flavor and texture. The green line just inside the skin is an indication of a sweet cantaloupe. People line up at our farmer's market to buy this wonderful tasting variety. Sow after all danger of frost is past and soil is warm, 1/2" deep in rows 4'-6' apart, thinning to 12" apart, or in hills 4'-6' apart, 3 seeds/hill. Transplants: Start indoors 3 weeks before last frost at 80-90 F. Grown by NB. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈35 seeds **M** \$7.00=0.25 oz., ≈275 seeds **LG** \$12.00=1 oz., ≈1100 seeds **4+ oz.** \$10.00/ oz. bulk rate **1 lb** \$150.00

ME3 ICE CREAM, GREEN FLESHED (GREEN MACHINE) Cert. **BD/OG** 80 days. Sweet, prolific light green fleshed melon bred by Merl Neidens. . It is a cross between heirloom Jenny Lind and Kansas melon varieties. The flesh is green with orange on the very inside next to the seed cavity. According to Biodynamic grower Steven Adams, the flavor is absolutely exquisite: It's terrifically sweet and, has a very soft, smooth texture. For Steven in Wisconsin, it produced 20-25 fruits per moderate vine. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈35 seeds **M** \$7.00=0.25 oz., ≈250 seeds **LG** \$9.00=1 oz., ≈1000 seeds **2+ oz.** \$8.00/ oz. bulk rate **1 lb** \$50.00

ME2 SHARLYN Cert. **BD/OG** 95 days. Sometimes considered a honeydew, Sharlyn's oval fruits are somewhat netted when mature. Juicy pale green flesh with a cast of light orange in the middle, While this melon slips before it is ripe, the outside skin or rind should have an warm light orange hue and then it has a great flavor. Its flesh is tenderly firm and not sloppy wet like some melon. California grower Harald Hoven says it performs best in milder climates with a sweet smell as well as taste, In our zone 4 in Nebraska, we sowed Sharlyn in May and it ripened in Sept. We had many 100 plus degree days through the summer. Grown by RG. ≈1,150 seeds/oz.

S \$3.00=1 g, ≈30 seeds

OKRA (Abelmoschus esculentus) ~475 seeds/oz.

SALE! OK1 CLEMSON SPINELESS Cert. **BD/OG** 60 days. HEIRLOOM from . Heirloom from 1939 All American selections. Hardy type for the north! Tall plants with large flowers followed in 5 days by tender pods that keep producing until frost. Harvest every 2-3 days when 2" long. Pod tips will snap off if tender and bend if woody. Pods are great in soups or stews. Grown by Lunquist CSA Biodynamic Farm in eastern Nebraska Grown by EL. ≈500 seeds/oz.

S \$3.00=3 g, ≈48 seeds **LG** \$11.00=1 oz., ≈475 seeds **2+ oz.** \$5.00/ oz. bulk rate

ONIONS (Allium cepa) ~6,500 seeds/oz.

ON2 CLEAR DAWN ONION SEED Cert. **BD/OG** 105 days. Mid-sized yellow storage onion selected 18 generations for high quality, long storage and uniformity by Biodynamic market gardeners. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB. ≈6,500 seeds/oz.

S \$3.00=1 g, ≈200 seeds **M** \$5.00=4 g, ≈800 seeds **LG** \$12.00=0.5 oz., ≈3200 seeds **1 oz.** \$17.00≈6500 seeds **1 lb** \$208.00

ON3 GIANT ZITTAU SEED Ecologically Grown 100-110 days. Delicious, yellow 4-5 inch semi-globe with excellent storage quality for Pacific Northwest. Beautiful golden skin. Sow spring, or in mild climates autumn. Grown in Oregon by long time Biodynamic gardener, Heike Eubanks. Zittau has been identified as both short day and intermediate day onion but others in the bay area of San Francisco say it worked very well as a day neutral onion. Heike Marie has been farming with BD methods at the acreage where Zittau was grown for over 30 years! Grown by HE. ≈6,500 seeds/oz.

Not available in 2022. Please check back in 2023.

ON4 ITALIAN RED SPINDLE ONION SEED Cert. **BD/OG** 95 days. **HEIRLOOM** Spindle shaped onion with a sweet, mild flavor. Matures early! Intermediate-day variety. Start in fall in mild climates. Great onion to take up the slack at the farmer's market before the storage onion types are done growing and ready to offer. Not storage type. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB. ≈6,500 seeds/oz.

PARSLEY (Petroselinum crispum) ~16,000 seeds/oz.

PA1 MOSS CURLED, FOREST GREEN Cert. **OG** 75 days. Vigorous, productive compact 10 in. tall plants with dark-green finely-cut, deeply-curved leaves. A high-yielding uniform strain. In the beginning, can take 2-3 weeks to germinate. Make sure to keep it watered until germination happens. Germs best in cooler weather but water can be a

help to cool soil for germinating. Cultivation Instructions: Can be planted at all times of year but germinates best in the cooler time. Best sown directly into soil outside spring or autumn. Keep well watered. Do not let it dry out until signs of germination around 2-3 weeks. From transplanting, roots tend to rot later in the season that is why it is best to sow direct outside. Parsley is winter hardy even in cold climates. However it is a biennial so early in the spring, the leaves can be harvested but later in the spring the parsley plants shoot to seed. Grown by NB and SAT. $\approx 14,000$ seeds/oz.

S \$3.00=0.25 g, ≈ 100 seeds **M** \$9.00=2 g, ≈ 900 seeds **LG** \$15.00=8 g, ≈ 3500 seeds

PA2 PLAIN-LEAFED ITALIAN Cert. **BD/OG 78 days**. Blat leaf type of parsley. Fresh leaves can be picked through the season for salads and garnishes. Best picked fresh. After cutting, bunches do not hold as long as moss curled but has a very nice flavor. $\approx 14,000$ seeds/oz.

SN3 FLAGPOLE Cert. BD/OG Blue-green leaves, Flagpole scallions if given space can grow to 2 feet tall with a substantial base around 1/2 inch wide. If planted tightly they are like most other scallions but somewhat taller. Grown by NB. ≈12,500 seeds/oz.

S \$3.00=1 g, ≈440 seeds **M** \$8.00=4 g, ≈1700 seeds **LG** \$15.00=15 g, ≈6000 seeds

SHALLOTS

SH1 DUTCH GOLD BULBS (french froglegs) Cert. BD/OG There are two ways to use these shallots. First possibility: You can plant them in the autumn or spring for early scallions and harvest. Scallions from Shallot bulbs are ready to harvest in early spring so they bridge the need for onions well. Second possibility is harvesting the bulbs in the autumn, and using them through the winter. Dutch Gold has a beautiful golden copper skin which protects the sweetest flavor of one of the longest storing shallots available. Whenever I use these shallots in scrambled eggs my friends say these are the best scrambled eggs I have ever eaten. Let me tell you; Its not the eggs! These shallots bring alive any dish in which you use them, says biodynamic/organic grower Brian Wickert who was the original source for these shallots.. Plant in early spring, harvest in July. Or plant in the autumn and harvest as early spring scallion-like shallots. They size up very fast in the spring and are like spring scallions. Plant 2 bulbs per foot for larger bulbs and space rows 18-24 inches apart. On the average, this year there are approximately 50 bulbs per pound. Plant the sets 1 inch deep with root plate down if possible. However, adequate yields can be obtained from randomly dropping the planting stock. Use 200-300 lb of planting stock per acre. They may be planted in fall 1 diameter at harvest. Allow to dry and cure in bins or netted sacks under cover. Under proper storage conditions they will last for 5-7 months. Grown by NB.

SPINACH *(Spinacia oleracea)* ~2,150 seeds/oz.

S1 BUTTERFLAY Cert. BD/OG 45 days. Vigorous early spinach with medium dark-green savoyed leaves and a full rich flavor. Quick-growing and late-bolting. Very dependable open polilnated variety in the spring and has overwintered nicely here in Nebraska with protection of hay bales to the north of the bed. Temperatures here can be -30 below F this past winter and it still overwintered. It rivals many hybrid varieties because it is from Biodynamic breeding and selection in Switzerland and Germany. Cultivation instructions: Very early springlant successions every 7-10 days, 1/2" deep and 1" apart in rows 12"-15" apart. For fall and winter sow late summer until 6 weeks before 20 F nights. For 20 pounds or more, call 308-631-5877 for ship price. Grown by BH and SAT. ≈2,150 seeds/oz.

S \$3.00=4 g, sows 30 ft., ≈300 seeds **M** \$7.00=1 oz., 200 ft., ≈2000 seeds **LG** \$15.00=4 oz., 800 ft., ≈8000 seeds **1 lb** \$44.00=3200 ft., ≈128000 seeds **5+ lb** \$40.00/ lb bulk rate

NEW! SS4 GAMMA Cert. OG 52 days. Later ripening, long standing variety, dark green leaves. In our informal trials, Gamma was one of the last to bolt. Grown by SAT. ≈2,200 seeds/oz.

S \$3.00=3 g **M** \$7.00=15 g **LG** \$10.00=1 oz. **XL** \$18.00=2 oz.

GR1 KOMATSUNA (Spinach Mustard) Cert. BD/OG 45 days. NOT in the Spinach family. Tender mild glossy dark-green leaves up to 12 in. long. Sown like spinach, but germinates more quickly, especially in a cold season. Does not have oxalic acid as is found in regular spinach, making it preferred by some people to regular spinach. Grown by NB. ≈12,500 seeds/oz.

S \$3.00=0.5 g, ≈200 seeds **M** \$7.00=2 g, ≈800 seeds **LG** \$15.00=15 g, ≈6000 seeds

SQUASH, SUMMER *(Cucurbita pepo)*

ZU3 RHEINAU GOLD DUO ZUCCHINI **Cert. BD/OG** Gold zucchini squash selected by the Biodynamic Seed Company in Rheinau Switzerland. Thick flesh and skin., with very good flavor. Does throw about 5 percent green zucchinis. They sell very well at the farmer's market here in Nebraska. People like their texture too. Grown by NB. *≈250 seeds/oz.*

S \$3.00=2 g, *≈15 seeds* **M** \$7.00=0.5 oz., *≈120 seeds*

ZU5 VERDE CHIARO D'ITALIA **Cert. BD/OG 48 days.** Light green Italian zucchini with cylindrical fruit which are early and productive with a good taste. Abundant blossom production as well. Grown by RG. *≈250 seeds/oz.*

S \$3.00=0.125 oz., *≈25 seeds* **M** \$7.00=0.5 oz., *≈100 seeds* **LG** \$16.00=2 oz., *≈500 seeds* **1 lb** \$70.00=*≈3700 seeds*

SS1 ZUCCHINI DARK GREEN SELECT **Cert. BD/OG 52 days.** This open pollinated zucchini performs as well if not better than the hybrids we have trialed. Our Dark Green Select is DARK green and has been a constant at our farmer's market every summer. While succession plantings can be done, our dark green lasts until the first hard frost in September or October. We personally selected this variety for field resistance in the difficult wet climates of eastern US where there cucumber beetles bring bacteria wilt. Our work is inspired by Raoul Robinson, a stellar Canadian breeder who wrote "RETURN TO RESISTANCE". Our selected strain of this zucchini is dark green, with smooth fruits and firm white flesh with good taste raw or cooked. We rely on Dark Green's production for our farmer's market here in Nebraska all season long. Grown by NB. *≈250 seeds/oz.*

S \$3.00=0.125 oz., *≈25 seeds* **M** \$7.00=1 oz., *≈250 seeds* **3+ oz.** \$4.50/ oz. bulk rate **1 lb** \$90.00

SQUASH, WINTER *(Cucurbita spp.)*

WS2 ACORN, GREEN SWEET REBA **Cert. BD/OG** One of the best of the bush acorns. High yielding green-skinned (4-5 fruits/plant) with a good sweet flavor. Bred by Cornell University. Resistant Early Bush Acorn (REBA) lives up to its name as it yields well even in wet climates where disease challenges abound for the pepo types of squash. Does great in our semi-arid climate too. Grown by NB. *≈312 seeds/oz.*

S \$3.00=0.125 oz., *≈35 seeds* **M** \$6.00=0.5 oz., *≈150 seeds* **LG** \$11.00=1 oz., *≈300 seeds*

NEW! WSP2Z DELICATA, ZEPPELIN **Cert. BD/OG** Deliciously sweet. Yellow with green and orange stripe, elongated shape and stores a little way into January. Our original source is from Wild Garden seed with a very interesting story about John Eveland providing seed that he had saved in the 90's after there was a bitter squash which got into the main body of commercial delicata seed. Baking this squash at 350 for up to an hour provides a real treat without sugar. Adding a little cinamon spice makes it real nice!

S \$4.00=3 g **M** \$11.00=1 oz.

WS7 HONEYNUT *(Cucurbita moshata x maxima)* **Cert. BD/OG** The rave reviews from our CSA customers of the flavor were almost unanimous. These mini 4-5 inch butternut are very high in sugar content. They are green before their ripening finishes then they turn a dark buff color similar to their relative: .regular butternut squash. Not a storage type! Lasts through Thanksgiving. Each time we grow them as seeds people we select the longest storing squash. Customers cannot get enough of them. Bred by Cornell University with some resistance to powdery mildew which is prevalent in the eastern US. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by NB. *≈300 seeds/oz.*

S \$3.00=3 g, *≈30 seeds* **M** \$9.00=0.5 oz., *≈150 seeds* **LG** \$20.00=2 oz., *≈600 seeds* **XL** \$70.00=0.5 lb, *≈2400 seeds* **1 lb** \$120.00=*≈4800 seeds*

WS5 KINDRED ORANGE BUTTERCUP *(C. maxima)* **Cert. BD/OG 90 days.** Early buttercup with turbaned 3-5 Lb. fruits ripening to a reddish-gold. Golden-yellow flesh. Vining plants. This petite buttercup is an optimum size for a two person serving. Earliest ripening maxima squash that we know of. Has been sought by cold climate gardeners in Alaska because it is one of the few varieties which will ripen there. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by SA. *≈150 seeds/oz.*

S \$3.00=5 g, ≈10 seeds **1 oz.** \$7.00≈150 seeds

WS4 NATIVE AMERICAN HIDATSA (*C. maxima*) **Cert. BD/OG 100 days. HEIRLOOM** from . from the Hidatsa native people who gardened on the Missouri River near a place called at the time Like a Fish Hook. Hubbard-type or french pumpkin type fruit with reddish pink skin. Hubbard-type or french pumpkin type fruit with reddish pink skin. Excellent keeper. Thick orange flesh at least one inch very flavorful. Outstanding ingredient for pies but also delicious by itself. Cultivation Instructions: Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by NB. ≈150 seeds/oz.

S \$3.00=0.25 oz., ≈20 seeds

PU3 NEW ENGLAND PIE **Cert. BD/OG 100-105 days.** The classic pie pumpkin. 10-12 in. diameter fruits with thick yellow flesh. Makes cute Jack-o-lanterns. Stores well. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. ≈185 seeds/oz.

TE1 STUPICE **Cert. BD/OG 58 days.** Our earliest ripening tomato. Good yields of small 3 oz. fruits with a rich sweet flavor. Performs well in cool conditions.

S \$3.00≈25 seeds **M** \$7.00=1 g, ≈250 seeds

TOMATO, SLICING, RED

TM1 BERNER ROSE **Cert. BD/OG 75 days. HEIRLOOM from Europe** 8-10 oz fruits with glistening tender smooth dark rose skin. Resists cracking on about 90 percent of the tomatoes. Outstanding flavor make it delicious in salads. Cooks into a good red sauce. Good seller at the farmer's market. Indeterminant. Sow inside 6 wks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Stake or cage indeterminate varieties for best results. Grown by NB.

S \$3.00≈25 seeds, ≈25 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$10.00=0.125 oz., ≈900 seeds **XL** \$15.00=0.5 oz., ≈3500 seeds

TM5 CORNE DE BOUC (Billy Goat Horn) **Cert. BD/OG 85 days.** French HEIRLOOM. Delicious unusual 5 in. long pointed fruits for fresh eating and sun-dried tomatoes, or sauce, with a slight smoky flavor. Name means goat's horn. Late ripening. Does best with being trellised. Indeterminant so it needs staking. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds

NEW! TM10 CRNKOVIC **Cert. BD/OG 85 days.** HEIRLOOM from from Yugoslavia traveling to the US via Yasha Crnkovic. It is disease-resistant producing mostly large 8 oz -1 lb pink beefsteak fruit with some small fruit. (Indeterminate means it keeps growing all season long and could use staking. Grown by NB.

S \$3.00≈25 seeds, ≈25 seeds **M** \$6.00=0.5 g, ≈100 seeds

TMS3 FIREWORKS **Cert. BD/OG 70 days.** Early red 6-12 oz. Fruits with very little cracking. Quick Determinant type yielding lots of red fruit for about in a 3-5 week period.

S \$3.00≈50 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$20.00=0.25 oz., ≈1800 seeds **XL** \$25.00=1 oz., ≈7000 seeds

TM3 KATJE **Cert. BD/OG 60 days.** Early, large fruits up to 8 oz. taste similar to Brandywine types, but earlier maturing. Our strain came from Adaptive Seeds who recommended it. We agree that its earliness and delicious flavor make it a real winner. Our Friends at Seed Ambassadors say: "Pink 3-5" slicer tomato, very early and reliable. Gorgeous and delicious, Originates in Sludjanka at the shores of lake Bajkal in Siberia, where it is grown outdoors. It is not clear whether it was developed by Katarina Konovna Sviatova (Katja) herself, or if it is an old Russian commercial variety, received from Sren Holt of Frsamlerne (Danish seed savers) who received it from the Sviatova family in Siberia." Grown by NB.

S \$3.00≈25 seeds, ≈25 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$10.00=0.125 oz., ≈900 seeds

Stake or cage indeterminate varieties for best results. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds

TM4 MATT'S WILD Cert. BD/OG 65-70 days. Indet. Everyone should have at least one plant of these in their garden. This little grape-sized red cherry tomato is packed with sweet, juicy flavor and is a quick favorite for all who try it. Children love it! Germinates best at a constant 78 degrees. Once germinated, we found the plants remained healthy even in cool wet climates. Produces beautiful trusses of ripe fruit which can be harvested complete for farmer's markets. It stores better and is very attractive when the whole truss is clipped, instead of picking individual

tomatoes. Teresa Arellanos de Mena from Hildago in eastern Mexico collected and shared this variety with her friend and colleague, Matt Liebman of the U. of Maine Ag School, who saved seeds and passed them on to Johnnys Selected Seeds. We are grateful to Johnnys for permission to offer this variety, and to Teresa and Matt who collected and saved it. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds **M** \$8.00=0.5 g, ≈100 seeds

TURNIPS (Brassica rapa)

TN 3 GOLDEN BALL **Cert. BD/OG** Delicious Foilage and mild tasting root slightly yellow. Direct sow for best results. Mild flavor if grown during the cool part of the year. ≈11,250 seeds/oz.

S \$3.00=0.5 g, sows 20 ft., ≈130 seeds **M** \$7.00=2 g, 80 ft., ≈400 seeds **LG** \$12.00=8 g, 320 ft., ≈1600 seeds

TN1 ZUERCHER **Cert. OG 50 days.** Purple skin on the top of the root, white below. White flesh throughout. Uniform and good storage. Direct sow for best results. Sow outdoors in early spring through late summer, inch deep, 1 inch apart in rows 12-18 inches apart. Mild flavor if grown during the cool part of the year. This seed is hot water treated from Switzerland Grown by SA. ≈8,000 seeds/oz.

S \$3.00=0.5 g, sows 20 ft., ≈130 seeds **M** \$8.00=2 g, 80 ft., ≈400 seeds

UNUSUAL CROPS

GR8 AMARA KARATE GREENS (*brassica carinata*) **Cert. BD/OG 50-65 days.** GreensA buttery textured green grown in the cool of auumn or spring, kale like mustard with smooth texture when cooked, steamed, sti fried and great addition to salads. Rich in vitamin C and folic acid.Grown out by Harald Hoven in California. Also Known as Ethiopian Kale or Abyssinian mustard. Fpr seed buffs from Wikipedia: brassica carinata is thought to result from an ancestral hybridisation event between Brassica nigra (genome composition BB) and Brassica oleracea (genome composition CC). Considered to be in development for an oil seed crop. ≈5,000 seeds/oz.

S \$3.00=1 g, ≈500 seeds **M** \$5.00=4 g, ≈2000 seeds **LG** \$10.00=1 oz., ≈5000 seeds **XL** \$30.00=4 oz., ≈20000 seeds

RD1 BLACK STORAGE **Cert. BD/OG 60-80 days.** HEIRLOOM from time of pyrramids, brought to the Americas in the 1500s. Large, 3-6 in. round roots with deep-black skin, solid white flesh. Sow near the summer solstice for winter storage and then enjoy all winter long. Good for winter tonic as a salad or adding to a pot of beans helps to curb flatulence Grown by LH. ≈2,500 seeds/oz.

S \$3.00=2 g, ≈150 seeds **M** \$7.75=0.5 oz., ≈1250 seeds **LG** \$14.00=2 oz., ≈5000 seeds **XL** \$75.00=1 lb

TM5 CORNE DE BOUC (Billy Goat Horn) **Cert. BD/OG 85 days.** Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds

ENV ENVELOPE FOR SEED SAVING Ecologically Grown Handy BLANK PACKET for seed saving trips or going to conferences where there is a seed swap, these small but servicable envelope with measurments of 4 3/16 inch by 2 11/16 inch, their flap is with the small extension to protect seed from falling out of the envelope.

S \$3.00≈12 Envelopes **M** \$5.00≈25 Envelopes

NEW! CB6 FILDERKRAUT Cert. OG VERY LARGE but the leaves are really tender, excellent for sour kraut with good flavor and also great for early sweet cabbage. Warning: It can grow to 20 pounds if not harvested early. Grown by BH and SAT. ≈7,000 seeds/oz.

S \$4.00≈25 seeds **M** \$6.00=0.5 g, ≈80 seeds **LG** \$12.00=2 g, ≈320 seeds

TM4 MATT'S WILD Cert. BD/OG 65-70 days. Indet. Everyone should have at least one plant of these in their garden. This little grape-sized red cherry tomato is packed with sweet, juicy flavor and is a quick favorite for all who try it. Children love it! Germinates best at a constant 78 degrees. Once germinated, we found the plants remained healthy even in cool wet climates. Produces beautiful trusses of ripe fruit which can be harvested complete for farmer's markets. It stores better and is very attractive when the whole truss is clipped, instead of picking individual tomatoes. Teresa Arellanos de Mena from Hildago in eastern Mexico collected and shared this variety with her friend and colleague, Matt Liebman of the U. of Maine Ag School, who saved seeds and passed them on to Johnnys Selected Seeds. We are grateful to Johnnys for permission to offer this variety, and to Teresa and Matt who collected and saved it. Grown by NB.

S \$3.00≈15 seeds, ≈15 seeds **M** \$8.00=0.5 g, ≈100 seeds

NEW! HTO TOBACCO, NICOTIANA TOBACUM (*NICOTIANA, TOBACUM*) Cert. BD/OG Can grow in zone 3 and above but would need to be started inside just like tomatoes. Impressive for a flowering border because it grows to over 6 feet tall. Even this year when it was beaten back by golf ball size hail at our farm it rebounded to over 6 feet!

S \$3.00≈100 seeds **M** \$12.00=0.1 g, ≈700 seeds **LG** \$25.00=1 g, ≈7000 seeds

NEW! WHW WHEAT, SNOW WHITE, HWWW (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. A hard white winter wheat from Kansas. Moderately drought tolerant. Straw height is typically two-to-three feet. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. White wheat is slightly sweeter than red wheat. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them:785-678-7006,

S \$9.00=1 lb **M** \$22.00=10 lb **LG** \$35.00=20 lb

NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. HEIRLOOM. Hard red winter wheat. Turkey Red is the parent to many varieties of hard red winter wheat in the United States. This Turkey Red wheat seed has been grown in Kansas since the 1870s. Straw height can reach upwards of four feet in areas with 20-inches plus moisture. It is adaptable to wet, dry, hot and cold areas. It does require a hard freeze in the winter to develop grain to harvest the following summer. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them:785-678-7006, ≈900 seeds/oz.

S \$10.00=1 lb **M** \$25.00=10 lb **LG** \$40.00=20 lb

WATERMELONS (*Citrullus lanatu*)

NEW! WM5 ALI BABA (*Citrullus Lanatus*) Cert. BD/OG HEIRLOOM . from Iraq Sweet and nice texture. Copious producer of 5-15 pound fruits in our area, light green skin, red flesh which is very quick to mature. Baker's Creek Heirloom seed company introduced this fine variety about 10 years ago after they were sent seed by Aziz Nail, an Iraqi gentleman who had collected this fantastic variety in Iraq. ≈300 seeds/oz.

S \$3.00=3 g, ≈30 seeds **M** \$8.00=0.5 oz., ≈150 seeds **LG** \$12.00=2 oz., ≈600 seeds

NEW! WM2 BLACK TAIL MOUNTAIN (*Citrullus Lanatus*) Cert. BD/OG 75 days. 75 day round 8-10 Lb. lightly striped fruits with sweet, crisp, red flesh. Developed in Idaho for short season areas. In our Nebraska climate we have found it to be very reliable. A biodynamic grower in Wisconsin, was able to get melons from direct sown seed in their garden which is remarkable. This ice box melon type is probably more hardy than sugar baby which is also an ice box melon. Black Tail was bred in the Idaho mountains by Glen Drowns when he was still in high school. He and his wife own sandhill preservation center: <https://www.sandhillpreservation.com/> Grown by NB. ≈675 seeds/oz.

S \$3.00=2 g, ≈30 seeds **M** \$8.00=8 g, ≈120 seeds **LG** \$12.00=1 oz. **2+ oz.** \$10.00/ oz. bulk rate

WM1 SUGAR BABY (*Citrullus Lanatus*) Cert. BD/OG 68 days. Called ice box watermelons because their small size fits well in the refrigerator. 6-12 lb small round red-fleshed fruits with a sturdy rind which ripens to dark green. Grown by NB. ≈ 600 seeds/oz.

S \$3.00=2 g, ≈ 35 seeds **M** \$7.00=0.5 oz., ≈ 300 seeds

NEW! WM6 TURKISH HEIRLOOM, CEKIRDEGI OYALI Cert. BD/OG HEIRLOOM from Turkey. Gorgeous SEED! Each seed has a specific and unique design revealed as the seed dries and the seed skin tightens. It was introduced to the US commercial production by "Two Seeds in a Pod Seed Company" in conjunction with Southern Exposure Seeds. Brought to us by our partner intern Timothy Wood. . Fruits weight 3-5 pounds, lots of seeds, red flesh and are mildly sweet in our zone 4 short 100 day summer. Most likely much sweeter when the summer is longer for ripening.. ≈ 300 seeds/oz.

S \$5.00=1 g, ≈ 12 seeds

SHIPPING INCLUDED IN BULK PRICE

WM3 YELLOW MOONBEAM (*Citrullus Lanatus*) Cert. BD/OG 75 days. Stabilized open-pollinated selection from Yellow Doll Hybrid. 5-8 Lb. round striped fruits with sweet flavorful yellow flesh. Matures in the North. Bred by Alan Kapular of Peace Seeds. ≈ 575 seeds/oz.

S \$3.00=2 g, ≈ 30 seeds **M** \$7.00=8 g, ≈ 120 seeds **LG** \$15.00=1 oz., ≈ 430 seeds

WHEAT (*Triticum aestivum*)

NEW! WHW WHEAT, SNOW WHITE, HWWW (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. A hard white winter wheat from Kansas. Moderately drought tolerant. Straw height is typically two-to-three feet. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. White wheat is slightly sweeter than red wheat. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006,
