Biodynamic VEGETABLE SEED Internship With Whole Farm Approach

2026 Spring through December*

(shorter term hands on farm experience option, ask!)

**(Applicants considered throughout the year if there are openings)*

Focal points of MHLEF experience: Organic and Biodynamic farming on 500 plus acres. We are NOP organic and Demeter certified Biodynamic® with intensive horticultural seed production on 4 acres with a focus on vegetable seed production. Activities include field preparation, cultivation growing, harvesting, threshing, cleaning, and packing seed for web sales. We have grass fed beef herd. Included in the internship is learning about our cows in relation to the farm's fertility for the seed, and hay and pastures.

EVENTS: Ancestral Skills in August, SEED CLASSES THROUGHOUT THE YEAR, Annual Fall Seed Festival

Email for schedule of the above mentioned events

2026 Autumn Seed Internship processing and marketing: Three to Four

month internship: September-December: Harvesting in September, cleaning and testing and learning about seed distribution throughout September-December. While you will learn much more of the context of seed if you come in the early spring, we offer the autumn internship for experienced farmers or gardeners who do not have the time to come during the year.

For questions or more information: Interested applicants please send short bio, resume, reasons for your interest and goals regarding agriculture to bcorymb@gmail.com and call to let us know that you have sent it. 308-631-5877.

Instructors: Seedsman Nathan Corymb, trained at Kimberton Hills and at Sativa biodynamic seed company in Switzerland, BD and organic farmer for over 30 years as well as a Master Naturalist, Beth Corymb, BM in music UNC, Greeley Co and at Kimberton Hills in BD and organic farming of vegetables, vegetable seed and herbs for over 30 years.
